Atlas of American Agriculture ABC-CLIO

"Beautifully written, a highly literate story of friendship, parenthood, and every other kind of love you can imagine."

—Marisa de los Santos, author of *Love Walked In* When Jill becomes both pregnant and single at the end of one spring semester, she and her two closest friends plunge into an experiment in tri-parenting, tri-schooling, and trihabitating as grad students in Seattle. Naturally, everything goes wrong, but in ways no one sees coming. Janey Duncan narrates the adventure of this modern family with hilarity and wisdom and shows how three lives are forever changed by (un)cooperative parenting, literature, and a tiny baby named Atlas who upends and uplifts their entire world. In this sparkling and wise debut novel, *The Atlas of Love*, Frankel's unforgettable heroines prove that home is simply where the love is.

A "fascinating" journey to little-known and contested lands

around the globe, from Tibet to the Isle of Man to Elgaland-Vargaland (*Geographical Magazine*). What is a country?

Acclaimed travel writer and Oxford geography don Nick Middleton brings to life the origins and histories of fifty states that, lacking international recognition and United Nations membership, exist on the margins of legitimacy in the global order. From long-contested lands like Crimea and Tibet to lesser-known territories such as Africa's last colony and a European republic that enjoyed independence for a single day, Middleton presents fascinating stories of shifting borders, visionary leaders, and "forgotten" peoples. "Engrossing . . . You'll not find Middle-earth, Atlantis or Lilliput inside, but you will find something just as intriguing . . . sure to prompt discussions about what makes a country a 'real country.'" —Seattle Times

Since antiquity, people have searched for a way to understand the colors we see—what they are, how many there are, and how they can be systematically identified and arranged in some kind of order. How to order colors is not merely a philosophical question, it also has many practical applications in art, design, and commerce. Our intense interest in color and its myriad practical applications have led people throughout history to develop many systems to characterize and order it. The number of color order systems developed throughout history is unknown but ranges in the hundreds. Many are no longer used, but continue to be of historical interest. Despite wrong turns and slow progress, our understanding of color and its order has improved steadily. Although full understanding continues to elude us, it seems clear that it will ultimately come from research in neurobiology, perception and consciousness. **Color Ordered** is a comprehensive, in-depth compendium of over 170 systems, dating from antiquity to the present. In it, Rolf Kuehni and Andreas Schwarz present a history and categorization of color systems, describe each one using original figures and schematic drawings, and provide a broad review of the underlying theory. Included are a brief overview of color vision and a synthesis of the various systems. This volume is a unique and valuable resource for researchers in color vision, and visual perception, as well as for neuroscientists, art historians, artists, and designers.

Nora Roberts, the #1 New York Times bestselling author of the epic *Year One* returns with *Of Blood and Bone*, a new tale of terror and magick in a brand new world. They look like an everyday family living an ordinary life. But beyond the edges of this peaceful farm, unimaginable forces of light and dark have been unleashed. Fallon Swift, approaching her thirteenth birthday, barely knows the world that existed before—the city where her parents lived, now in ruins and reclaimed by nature since the Doom sickened and killed billions. Traveling anywhere is a danger, as vicious gangs of Raiders and fanatics called Purity Warriors search for their next victim. Fallon, in possession of gifts, are hunted—and the time is coming when her true nature, her identity as The One, can no longer be hidden. In a mysterious shelter in the forest, her training is about to begin under the guidance of Mallick, whose skills have been honed over centuries. She will learn the old ways of healing; study and spar; encounter faeries and elves and shifters; and find powers within herself she never imagined. And when the time is right, she will take up the sword, and fight. For until she grows into the woman she was born to be, the world outside will never be whole again.
The Macmillan World Atlas Farrar, Straus and Giroux
 Finalist for the 2022 Governor General's Literary Awards for Fiction *Pure Colour* is a galaxy of a novel: explosive, celestially bright, huge, and streaked with beauty. It is a contemporary bible, an atlas of feeling, and an absurdly funny guide to the great (and terrible) things about being alive. Sheila Heti is a philosopher of modern experience, and she has reimagined what a book can hold. Here we are, just living in the first draft of Creation, which was made by some great artist, who is now getting ready to tear it apart. In this first draft of the world, a woman named Mira leaves home to study. There, she meets Annie, whose tremendous power opens Mira's chest like a portal—to what, she doesn't know. When Mira is older, her beloved father dies, and his spirit passes into her. Together, they become a leaf on a tree. But photosynthesis gets boring, and being alive is a problem that cannot be solved, even by a leaf. Eventually, Mira must remember the human world she's left behind, including Annie, and choose whether or not to return.
