### **Cerebral Palsy** Springer Nature

This book helps rehabilitators and caregivers understand the multifaceted needs of children with cerebral palsy or other neuromotor impairments in order to plan and implement an effective treatment regimen. Drawing on the authors extensive experience spanning several decades, it addresses the sensitive challenge of rehabilitation, which cannot and must not be confined by the rigid schemes of established schools. In particular, the book provides numerous practical suggestions, intended to guide the reader through correct clinical reasoning, setting goals and subsequent treatment. Furthermore, it includes chapters on evaluating and treating the upper limbs, feeding and communication problems, as well as on the care of soft tissues and the management of the visual difficulties in these children. The book is a valuable resource for physiotherapists, occupational therapists, speech therapists and other caregivers.

With its archaeological sites, colonial architecture, pristine beaches, and alluring cities, Mexico has long been an attractive destination for travelers. The tourist industry ranks third in contributions to Mexico's gross domestic product and provides more than 5 percent of total employment nationwide. Holiday in Mexico takes a broad historical and geographical look at Mexico,

covering tourist destinations from Tijuana to Acapulco and the development of tourism from the 1840s to the present day. Scholars in a variety of fields offer a complex and critical view of tourism in Mexico by examining its origins, promoters, and participants. Essays feature research on prototourist American soldiers of the mid-nineteenth century, archaeologists who excavated Teotihuacán, business owners who marketed Carnival in Veracruz during the 1920s, American tourists in Mexico City who promoted goodwill during the Second World War, American retirees who settled San Miguel de Allende, restaurateurs who created an "authentic" cuisine of Central Mexico, indigenous market vendors of Oaxaca who shaped the local tourist identity, Mayan service workers who migrated to work in Cancun hotels, and local officials who vied to develop the next "it" spot in Tijuana and Cabo San Lucas. Including insightful studies on food, labor, art, diplomacy, business, and politics, this collection illuminates the many processes and individuals that constitute the tourism industry. Holiday in Mexico shows tourism to be a complicated set of interactions and outcomes that reveal much about the nature of economic, social, cultural, and environmental change in Greater Mexico over the past two centuries. Scolioses, torticolis, lumbagos, arthrose... Gilles Bacigalupo, comme il l'a fait dans son précédent livre Mal de dos, mal de bouffe, poursuit ici sa démonstration sur le lien indéniable entre l'alimentation et les troubles musculo-squelettiques.Soyons clairs

: le titre de ce livre se veut volontairement provocateur. Son propos n'est évidemment pas de brocarder l'activité sportive. Il vise, en revanche, à expliquer, de la manière la plus scientifique possible, qu'il est presque toujours illusoire de vouloir guérir une faiblesse musculaire par de la musculation. Car, dans la majorité des cas, cette faiblesse n'est pas provoquée par l'inactivité et la sédentarité, mais résulte d'une contracture chronique du muscle, que des exercices physiques seuls ne pourront pas éradiquer et qu'ils pourront même aggraver. Notre musculature est le reflet de notre santé. Celle-ci dépend essentiellement de notre comportement au quotidien, et particulièrement de notre hygiène alimentaire. La seule arme que nous possédons contre la contracture, c'est donc notre fourchette ! affirme Gilles Bacigalupo. C'est par une alimentation saine, consciencieusement mastiquée et parfaitement assimilée que nous débarrasserons notre organisme des mauvaises graisses responsables de nos contractures musculaires. Nous redécouvrirons alors le plaisir et le bonheur de jouir d'un corps décontracté en pleine santé. Gilles Bacigalupo a quarante années d'expérience en tant que masseur-kinésithérapeute. Spécialisé dans la prise en charge du mal de dos et de l'arthrose, il est l'auteur de Mal de dos, mal de bouffe chez le même éditeur.
