Staffing Organizations: Contemporary Practice and Theory, the new third edition of a classic in the field, shows how organizations of all sizes can use effective staffing procedures as a source of sustained competitive advantage. Practically, the book shows how to choose, develop, and administer effective staffing procedures, including conducting job analyses, defining and measuring job performance, identifying predictors of performance that are both valid and legally defensible, and using this information to make sound hiring decisions. All three authors are active practitioners and recommendations based on their experiences are interwoven throughout the chapters. The authors are also grounded in a scientific, conceptual perspective that informs what they say and do in the staffing area. They review cutting-edge theory and research in diverse areas of importance to the practice of staffing, and identify scientific advances as well as areas that should be informed by additional research. Examples of such cutting-edge issues include: *multilevel staffing models linking individual, group, and organizational levels; *comprehensive consideration of diversity and cross-cultural challenges; *the opportunities and challenges of the use of information technology in staffing; *the legal, professional, and ethical challenges facing staffing practitioners; *modern statistical approaches (e.g., structural equation modeling, item response theory, hierarchical linear modeling); and *integrated models of staffing predictors and frameworks for understanding predictor and criterion spaces. Each chapter contains real-world examples and illustrations, a discussion of best practices, practical recommendations, and directions for future research. In doing so, Staffing Organizations: Contemporary Practice and Theory is a modern version of a genuine classic.

Matching DNA samples from crime scenes and suspects is rapidly becoming a key source of evidence for use in our justice system. DNA Technology in Forensic Science offers recommendations for resolving crucial questions that are emerging as DNA typing becomes more widespread. The volume addresses key issues: Quality and reliability in DNA typing, including the introduction of new technologies, problems of standardization, and approaches to certification. DNA typing in the courtroom, including issues of population genetics, levels of understanding among judges and juries, and admissibility. Societal issues, such as privacy of DNA data, storage of samples and data, and the rights of defendants to quality testing technology. Combining this original volume with the new update-The Evaluation of Forensic DNA Evidence-provides the complete, up-to-date picture of this highly important and visible topic. This volume offers important guidance to anyone working with this emerging law enforcement tool: policymakers, specialists in criminal law, forensic scientists, geneticists, researchers, faculty, and students.

Contributors to this anthology examine how the police go about policing themselves in the real world. Police officers enjoy considerable autonomy and discretion, which makes strict accountability and close supervision the exception. In the lower ranks, mutual back-scratching, the code of silence, and the falsified report, can be used to cover up work avoidance, short-cut methods, illicit violence, and pay-offs. In spite of this, there are clearly constraints on police behavior in the form of both written and unwritten institutional controls. This book probes the various sources of organizational control, including: formal internal disciplinary regulations, the norms and values of the occupational culture, external legal constraints, and the overriding need to prevent scandals. The authors also suggest improving organizational control through managerial reforms to promote not just proficient bureaucrats, but leaders who possess insight into, and empathy for, the inescapable dilemmas of the men and women on the front lines.
