Religious Dynamics under the Impact of Imperialism and Colonialism Psychology Press

At the heart of the effort to enact and scale up successful school reforms is the need for more robust links between research and practice. One promising approach is design development, a methodology widely used in other fields and only recently adapted to education, which offers a disciplined process for identifying practical problems, assessing evidence of outcomes, accounting for variability in implementation and results, and establishing a foundation for broader understanding of the problem and proposed solutions. This exciting new book provides a practical guide for education leaders who are seeking to address issues of equity in their schools and want to pursue this approach. The book provides a step-by-step description of the process, augmented by case studies of four education leaders: Christine, a middle school principal who is concerned with the volume of disciplinary referrals in her school; Michelle, an elementary school principal who wants to address achievement gaps; Eric, an assistant superintendent who wants to improve the quality of principals' instructional feedback to teachers; and Nora, a high school principal who is concerned about the use of racial and homophobic slurs in the hallways. The book follows each of these leaders as they formulate and refine interventions to address these problems. Design-Based School Improvement also includes a series of "excursions into theory" that discuss the research basis for design-based improvement. The author—a leading thinker about policy implementation and school reform—shows a profound appreciation for the complexity of work in schools and the deep and sustained thinking entailed in undertaking productive change. By bringing theory to life and putting it in the hands of skilled practitioners, this book promises to

become an invaluable resource for education leaders seeking to solve problems of equity and social justice in schools.

In 1988, the Chicago public school system decentralized, granting parents and communities significant resources and authority to reform their schools in dramatic ways. To track the effects of this bold experiment, the authors of *Organizing Schools for Improvement* collected a wealth of data on elementary schools in Chicago. Over a seven-year period they identified one hundred elementary schools that had substantially improved—and one hundred that had not. What did the successful schools do to accelerate student learning? The authors of this illuminating book identify a comprehensive set of practices and conditions that were key factors for improvement, including school leadership, the professional capacity of the faculty and staff, and a student-centered learning climate. In addition, they analyze the impact of social dynamics, including crime, critically examining the inextricable link between schools and their communities. Putting their data onto a more human scale, they also chronicle the stories of two neighboring schools with very different trajectories. The lessons gleaned from this groundbreaking study will be invaluable for anyone involved with urban education.

This book explores ways of teaching that are free from determinist beliefs about ability. In a detailed critique of the practices of ability labelling and ability-focussed teaching, *Learning without Limits* examines the damage these practices can do to young people, teachers and the curriculum. Drawing on a research project at the University of Cambridge, the book features nine vivid case studies (from Year 1 to Year 11) that describe how teachers have developed alternative practices despite considerable pressure on them and on their schools and classrooms. *American Guru* Enlightennext Media

This small book from a talk given by spiritual teacher Andrew Cohen in Bodhgaya, India in early 1996 is an explosive and captivating journey into the nature of what it means to be awake. In this talk Andrew Cohen takes the reader by the hand in a profound step-by-step investigation into the multidimensional nature of what it means to be truly whole. *Das Leben, mein Meister* Routledge

The *Sociology of Religious Movements* represents the culmination of the work begun in the award-winning *The Future of Religion* and *A Theory of Religion*, and explains religious movements in the context of political, cultural and social movements.

W. Robertson Smith and the Sociological Study of Religion Epigraph Books

A new edition of this spiritual classic with a preface by Stephan Bodian, friend of the late author and the original editor of *Collision with the Infinite*. Stephan writes: "Since the book first appeared in 1996, spiritual awakening and the nondual perspective it reveals have become increasingly popular among seekers who realize the limitations of progressive practices and want more immediate access to the limitless openness and freedom of their essential nature. At the same time, a number of teachers have emerged who point directly to this truth and invite their students to inquire into their experience, rest in awareness, and realize the truth for themselves. Long before these resources were readily available, Suzanne had a powerful awakening that completely obliterated the illusion of a separate self. But in 1982 she could find no one to guide her through the process, and as a result she spent years in fear, wandering from therapist to therapist, desperately trying to cure herself of being no one, because no one in her world knew what to make of her experience. After a dozen years in the wilderness of what she describes as a spiritual wintertime, she emerged into the radiant springtime of full nondual realization. Because she awoke without a teacher or tradition, and her understanding was so complete, her detailed descriptions of how the vastness

functions through these body-minds to realize itself in form are original, and fresh from their source. I'm thrilled to have this spiritual classic back in print, after years of languishing in obscurity. Now I can begin recommending it to my students once again and share with them the clarity of her vision. As I say in the afterword, Suzanne never pretended to be a teacher, preferring instead to call herself a describer of what it's like to live as the vastness. In this profound and articulate memoir, she chronicles her journey, and in the process transmits the wisdom that revealed itself to her." Editorial reviews "Collision with the Infinite is like a diamond on fire with living spirit, and a testament to the strange and wonderful ways that spiritual awakening can unpredictably burst forth in any one of us at any time. Read this book as what it has always been, a modern-day revelation of how spiritual presence came alive in one extraordinarily ordinary woman, and how she embodied it like the sky embodies a shooting star." - Adyashanti "A fascinating, deeply moving account of a powerful spiritual opening and the ensuing process of understanding and integration. The book dispels some of our most cherished myths about spiritual awakening-especially that it is a blissful and easy process. Awakening is not the end of the path, but the beginning of a sometimes difficult journey." -Steve Taylor Ph.D., author of *The Leap: The Psychology of Spiritual Awakening*

The study of the ideas and practices associated with occultism is a rapidly growing branch of contemporary scholarship. However, most research has focused on English and French speaking areas and has not addressed the wider spread and significance of occultism. *Occultism in a Global Perspective* presents a broad international overview. Essays range across the German magical order of the *Fraternitas Saturni*, esoteric Satanism in Denmark, sexual magic in Colombia and the reception of occultism in modern Turkey, India and the former Yugoslavia. As any other form of cultural practice, the occult is not isolated from its social, discursive, religious, and political environment. By studying occultism in its global context, the book offers insights into the reciprocal relationships that colour

and shape regional occultism.

Revolutionary idealist and vocal cultural critic Andrew Cohen promotes a new spiritual paradigm in this exploration of a true visionary's controversial school of thought. Though Cohen was once a teacher of personal enlightenment, he now quests for a joint spiritual longing and humanitarian love-two forces that enable and empower each other to the point where enlightenment becomes evolution. Uncompromising in his call for human transformation, Cohen is presented as an illustrious spiritual figure whose liberated consciousness and ruthless deconstruction of the culture around him have kept everyone talking; in 2004, he was invited to address the Parliament of World Religions, an unusual honor for a man buoyed by no established spiritual tradition and unyielding in his demand for integrity.

This is a mother's account of her experience as a disciple of her own son - Andrew Cohen, a well-known American guru - and of her struggle to free herself from his control. What had been a close, affectionate relationship slowly becomes a nightmare of domination. The story begins quietly in India and unfolds with growing intensity as Andrew, his mother, and a few people who have gathered around him, travel to England, Holland, Israel, and finally the United States, but which time Andrew has attracted hundreds of devotees to his "meetings." The abuse of power, incessant fear, and the psychology of obsession are all explored here from an intimate perspective. Since brainwashing cults and their grandiose gurus are proliferating - in this country and all over the world - this book is not only a mother's lament, but also a finger pointing to the growing appeal everywhere of authoritarianism and absolutism.

Since the mid-1960s, new religious movements—some exotic, some homegrown—have burgeoned all over the United States. A sense of self-awareness and spiritual sensitivity have found expression in the lives of large numbers of people, especially among youth. Why would this happen? What do these movements teach, and what effect do they have on the future? How does religious consciousness relate to other manifestations of social change, such as communal living, group therapy, and radical politics? Beginning in 1971, an extensive research project was undertaken by a team of sociologists, historians, and theologians seeking answers to these questions. Through a combination of interviews and participant observations, they studied new religious and quasi-religious groups in the San Francisco Bay Area, a spawning ground for upwards of one hundred such movements. *The New Religious Consciousness* opens with reports on three Eastern-based movements: the Healthy, Happy, Holy Organization, Hare Krishna, and Divine

Light (more popularly known by the name of its leader, Maharaj Ji). Three quasi-religious movements are then considered: the New Left, the Human Potential Movement (Esalen, EST, Scientology, etc.), and Synanon. Next, three movements having their roots in Western religious traditions are examined: the Christian World Liberation Front (an offshoot of the Jesus Movement), Catholic Charismatic Renewal, and the Church of Satan (whose members believe in witchcraft). Succeeding chapters are devoted to estimating the impact of these movements on established religions and the population at large and to the history of earlier periods of religious ferment in the United States. The book concludes with provocative essays by the editors in which they present separate and differing analyses of the sources, nature, and meaning of the new religious consciousness. A variety of perspectives are represented here: phenomenological, theological, experiential, sociological, and social psychological. The result is a book rich in insight about the nature of new religions. Taken together with a companion volume, Robert Wuthnow's *The Consciousness Reformation*, also published by University of California Press, *The New Religious Consciousness* provides the first comprehensive study of American countercultural belief systems. William Robertson Smith (1846-94) was one of the most profound and versatile Victorian thinkers--a principal figure in the development of social anthropology and the founder of modern sociology of religion. In *W. Robertson Smith and the Sociological Study of Religion*, T. O.

Beidelman, a renowned anthropologist and ethnographer, relates Smith's personality and career to the radical nature of his investigations. His study contains the only readily available account of Smith's life, and represents the only attempt to place Smith's work within the contemporary perspective of the field of social studies. Professor Beidelman discusses how Smith introduced to Britain the revolutionary interpretations in the fields of biblical and Semitic literary studies first formulated by Continental scholars, as well his original views on the interrelationship between human psychology, social structure, and history. The author also reviews the intellectual background and basic themes of Smith's work, the impact that it had upon his contemporaries, and the later influence that his theories had upon such diverse thinkers as Durkheim, Mauss, Hubert, Frazer, Radcliffe-Brown, Evans-Pritchard, and Freud. In his *Lectures on the Religion of the Semites*, his last and most famous work, Smith sought to define the essential nature of religious behavior, and he approached the analysis of social institutions through comparative and historical studies. This is a problem that remains central to social anthropology, and the general methods by which Smith endeavored to clarify it are still employed today. Professor Beidelman indicates the ways in which Smith may still be read with profit, and he supplements his study with an extensive bibliography of works by and about this influential thinker.

As a field, education has largely failed to learn from experience. Time after time, promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In *Learning to Improve*, the authors argue for a new approach. Rather than "implementing fast and learning slow," they believe educators should adopt a more rigorous approach to improvement that allows the field to "learn fast to implement well." Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt, and successfully scale up promising interventions in education. Organized around six core principles, the book shows how "networked improvement communities" can bring together researchers and practitioners to accelerate learning in key areas of education.

Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. *Learning to Improve* offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation's schools and colleges.

Ghost-written by Adamski acolyte Lucy McGinnis, this novel contains some of the most inept scientific ideas imaginable. In the early 1950s, "Professor" George Adamski laid the groundwork for all subsequent UFO contactees.
