A New York Times, USA Today, Wall Street Journal, and Amazon Charts Bestseller! For fans of Hidden Figures, comes the incredible true story of the women heroes who were exposed to radium in factories across the U.S. in the early 20th century, and their brave and groundbreaking battle to strengthen workers' rights, even as the fatal poison claimed their own lives... In the dark years of the First World War, radium makes gleaming headlines across the nation as the fresh face of beauty, and wonder drug of the medical community. From body lotion to tonic water, the popular new element shines bright. Meanwhile, hundreds of girls toil amidst the glowing dust of the radium-dial factories. The glittering chemical covers their bodies from head to toe; they light up the night like industrious fireflies. With such a coveted job, these "shining girls" are the luckiest alive — until they begin to fall mysteriously ill. And, until they begin to come forward. As the women start to speak out on the corruption, the factories that once offered golden opportunities ignore all claims of the gruesome side effects. And as the fatal poison of the radium takes hold, the brave shining girls find themselves embroiled in one of the biggest scandals of America's early 20th century, and in a groundbreaking battle for workers' rights that will echo for centuries to come. A timely story of corporate greed and the brave figures that stood up to fight for their lives, these women and their voices will shine for years to come. Written with a sparkling voice and breakneck pace, *The Radium Girls* fully illuminates the inspiring young women exposed to the "wonder" substance of radium, and their awe-inspiring strength in the face of almost impossible circumstances. Their courage and tenacity led to life-changing regulations, research into nuclear bombing, and ultimately saved hundreds of thousands of lives...

Autumn's Wish Macmillan

The debut novella from one of contemporary fiction's most exciting young voices, now in a new edition. Salem, Massachusetts, 1851: McGlue is in the hold, still too drunk to be sure of name or situation or orientation—he may have killed a man. That man may have been his best friend. Intolerable memory accompanies sobriety. A-sail on the high seas of literary tradition, Ottessa Moshfegh gives us a nasty heartless blackguard on a knife-sharp voyage through the fogs of recollection. They said I've done something wrong? . . . And they've just left me down here to starve. They'll see this inanity and be so damned they'll fall to my feet and pass up hot cross buns slathered in fresh butter and beg I forgive them. All of them . . . : the entire world one by one. Like a good priest I'll pat their heads and nod. I'll dunk my skull into a barrel of gin.

The Best Tool of the Millennium The seeds of Rybczynski's elegant and illuminating new book were sown by The New York Times, whose editors asked him to write an essay identifying "the best tool of the millennium." The award-winning author of *Home, A Clearing in the Distance*, and *Now I Sit Me Down*, Rybczynski once built a house using only hand tools. His intimate knowledge of the toolbox -- both its contents and its history -- serves him beautifully on his quest. *One Good Turn* is a story starring Archimedes, who invented the water screw and introduced the helix, and Leonardo, who sketched a machine for carving wood screws. It is a story of mechanical discovery and genius that takes readers from ancient Greece to car design in the age of American industry. Rybczynski writes an ode to the screw, without which there would be no telescope, no microscope -- in short, no enlightenment science. One of our finest cultural and architectural historians, Rybczynski renders a graceful, original, and engaging portrait of the tool that changed the course of civilization.

In the shifting sands of the desert, near an unnamed metropolis, there is an institute where various fellows come to undertake projects of great significance. But when our sort-of hero, Percy Frobisher, arrives, surrounded by the simulated environment of the glass-enclosed dome of the Institute, his mind goes completely blank. When he spills something on his uniform—a major faux pas—he learns about a mysterious shop where you can take something, utter the command “same same,” and receive a replica even better than the original. Imagining a world in which simulacra have as much value as the real—so much so that any distinction between the two vanishes, and even language seeks to reproduce meaning through ever more degraded copies of itself—Peter Mendelsund has crafted a deeply unsettling novel about what it means to exist and to create . . . and a future that may not be far off.

Book Two in the *PARANORMALS* series! Six years ago, when the White Flash washed over planet Earth, it left behind an unbelievable legacy: A small number of people changed -- some instantaneously, some months or years later -- giving them superhuman abilities. Sadly, most of these paranormals have chosen to use these gifts for their own selfish goals. Only a handful have joined the Paranormal Control Agency to help stop these rogues, with even fewer choosing the path of the hero. But the Paranormal Effect was not the only astonishing change to take place. Within 24 hours of the White Flash's appearance, SETI detected its first extraterrestrial radio signal ... and then another ... and then another. At any other time in history, this would have been the biggest news of our generation, but for the majority of the global population, the superhumans among us took precedence over voices drifting from light-years away. They must face the wondrous rewards and the terrible consequences of our learning that We Are Not Alone.

Clover Twig and the Magical Cottage Ravenio Books

The award-winning author of *The End of Vandalism* pens "a gorgeous, inexplicably sad and funny

novel about screwups trying to do better" (Salon). In this mesmerizing novel, Tom Drury once again journeys to the quiet Midwest to spend an action-packed October weekend in the lives of a precarious family whose members all want something without knowing how to get it: for Charles, an heirloom shotgun; for his wife, Joan, the imaginative life she once knew; for their young son, Micah, a knowledge of the scope and reliability of his world, aided by prowling the empty town at night; and for Joan's daughter, Lyriss, a stable foot from which to begin to grow up. Sometimes together, sometimes crucially apart, father, mother, son, and daughter move through a series of vivid encounters that demonstrate how even the most provisional family can endure in its own particular way. "A beguiling novel . . . perceptive and captivating." —The New York Times "Entrancing." —The Guardian "Startling and utterly original." —Newsday "Drury is an absolutely delightful writer who has carved out a world of his own in American fiction, one that is odd, revealing, and yet filled with love." —Library Journal "The trick and true pleasure here are in the utterly ordinary context these extraordinary events occur in. Drury never misses a beat—the quiet moments dazzle as much the louder ones." —Kirkus Reviews

Burn for Me Simon and Schuster

This little book is confined to very simple "reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions." The shape and motions of the earth are fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning "the meaning of map," and how to use it. These

subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child's mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which "Geography" so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on "Place"—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason
