This book offers an alternative view to current postmodern approaches to composition. It takes a critical realist stance to arrive at the “essence” of written communication with the aim of informing a practical application: a computerised writing tutor. Following Robert Franck’s seminal work on modelling, a theoretical model of writing was first formulated, consisting of an architecture of functions which constitute the prerequisites for effective communication. Next, an applied model - a composing algorithm with an input option - was developed, showing composing to be a systemic social process with intra- and extra-systemic variation. The algorithm provided the design template for a writing tutor program which models for the learner both the systemic and the socially situated nature of writing. This book establishes composing as a communicative interaction, and shows the essential dynamism of writing, while offering an exemplar of a systems approach to modelling in the social sciences.

Supervision for Occupational Therapy is a practical text that guides both supervisors and supervisees to make the most out of supervision opportunities. While supervision in occupational therapy is vital as a mechanism for public and professional safety, learning how to do it successfully on-the-job can be a daunting prospect. By gathering stories from different professions, sectors, and parts of the world, this book is a hands-on guide to help occupational therapists navigate the complexities of supervision throughout their careers. This book presents, for the first time, the 3Cs for Effective Supervision (Connections, Content, and Continuing development), which offers a platform for supervisors and supervisees to frame their supervision practices. The chapters

discuss common models and theories for supervision, ideas for how to structure relationships and sessions, templates and question guides for enhancing conversations, and practical strategies for dealing with common challenges. The book also considers the impact of workforce issues, diverse populations, and regional/rural/remote practice on supervision. Offering career-span advice and a process of self- and professional development to work through, this book provides a way to scaffold and support supervisors' and supervisees' learning and practice of supervision throughout working life. It is an essential guide for all occupational therapists. The eResources for this book are available at www.Routledge.com/9780367552428

The book is divided into two main areas: rational and emotional. I believe that a good manager must first of all master the rational part, but to become an excellent and complete manager, he or she cannot forget the emotional part of the job. Blending the rational and emotional parts will be a recipe for success and fulfillment. The book is a practical guide with intent to offer pragmatic tools and frameworks to new managers. It is the book I wished to have when I started my journey as a manager with business responsibilities. I wrote it based on my real life management experience. I took notes for about four years of the lessons I learned during my first field assignment. I struggled, but finally I have been successful. I wished during my beginnings to have a mentor to coach me and help me to speed up my learning curve. I wish this book can be the practical guide to help others reducing the stress and worries that inevitably happen when taking on a managerial role for the first time. I also wish to help new managers to deliver better and faster high performances.
