*Decolonizing Childhoods* International Labour Organization

Focusing on contexts of accelerated economic and political reform, this volume critically examines the role of slogans in the contemporary projects of populist mobilization, neoliberal governance, and civic subversion. Bringing together a collection of ethnographic studies from Greece, Slovakia, Poland, Abu Dhabi, Peru, and China, the contributors analyze the way in which slogans both convey and contest the values and norms that lie at the core of hegemonic political economic projects and ideologies.

**Institutional Change and Power Asymmetry in the Context of Rural India** Pearson South Africa

The authors of the bestselling *IS IT JUST ME OR IS EVERYTHING SHIT?* survey the post-crash landscape. Are we better people now, or just the same people with less money? From bank bailouts to enviro-copouts; from Tory politicians listening to The Jam to celebrity credit crunch 'victims' Grant Bovey and Anthea Turner; from BNP coppers to Christian theme parks to middle-class shoppers banging on about budget supermarkets; plus everyone banging on about *The Wire* . . . Funny, sharp and timely, *IS IT JUST ME OR HAS THE SHIT HIT THE FAN?* asks the crucial questions of the new age, like; why are the people who screwed the world still running the world and screwing the world until we're all screwed more than we've ever been screwed before?

*China: From Permanent Revolution to Counter-Revolution* International Labour Organization

European colonization of other continents has had far-reaching and lasting consequences for the construction of childhoods and children's lives throughout the world. Liebel presents critical postcolonial and decolonial thought currents along with international case studies from countries in Africa, Latin America, and former British settler colonies to examine the complex and multiple ways that children throughout the Global South continue to live with the legacy of colonialism. Building on the work of Cannella and Viruru, he explores how these children are affected by unequal power relations, paternalistic policies and violence by state and non-state actors, before showing how we can work to ensure that children's rights are better promoted and protected, globally.

*My Name is Today* EQUATIONS

Child labour is a serious and contentious issue throughout the developing world and it continues to be a problem whose form and very meaning shifts with social, geographical, economic and cultural context. While the debate about child labour practice in developing countries appears to be motivated by growing competition in labour intensive products brought about by globalization, studies on this issue are both sparse and lopsided. This important book aims to shed light on this debate by documenting the experience of South Asian developing countries which have experienced rapid income and export growth. Based on evidence from Bangladesh, India, Nepal, Pakistan and Sri Lanka, this volume aims to improve our understanding about the link between trade, growth and child labour practices, as well as management of child labour in developing countries.

**Is It Just Me Or Has The Shit Hit The Fan?** Routledge

The purpose of this collection is to bring together representative examples of the most recent work that is taking an understanding of children and childhood in new directions. The two key overarching themes are diversity: social, economic, geographical, and cultural; and agency: the need to see children in industrial England as participants - even protagonists - in the process of historical change, not simply as passive recipients or victims. Contributors address such crucial subjects as the varied experience of work; poverty and apprenticeship; institutional care; the political voice of children; child sexual abuse; and children and education. This volume, therefore, includes some of the best, innovative work on the history of children and childhood currently being written by both younger and established scholars.

*Bulletin of Cultural Life in the U.S.S.R.* Jessica Kingsley Publishers

Society has celebrated children even as it has denied fundamental rights and dignity to millions of them. Mass movements and social awareness against injustices like child labour, lack of access to health and education, child sexual abuse and trafficking have been catalysed by reformers like Nobel Peace Laureate Kailash Satyarthi. As a result of his untiring efforts, child labour is now universally considered to be a social evil that has to be abolished. Equally important, societies and governments across the world have accepted that access to quality education is the fundamental right of every child. Even as he has fought for justice and dignity for children, Mr. Satyarthi has found time to provoke, inspire and illuminate young minds by writing about children, their dreams and the power of their humanity. This book is a compilation of columns and interviews which highlight the continuing struggle to create safe childhoods. Readers will find much to introspect after going through this collection.

*The Business of Human Rights* Granta

Child labour in fishing

*In the Name of Child Labour* Routledge

Most historical studies of child labour have tended to confirm a narrative which witnesses the gradual disappearance of child labour in Western Europe as politicians and social reformers introduced successive legislation, gradually removing children from the workplace. This approach fails to explain the return or continuance of child labour in many affluent European societies. Centuries of Child Labour explains changes in past child labour and attitudes to working children in a way that helps explain the continued survival of the practice from the seventeenth through to the late twentieth centuries. Centuries of Child Labour conveys a richer sense of child labour by comparing the experiences of the Northern European periphery to the paradigmatic cases of Britain, and France. The northern cases, drawing heavily on empirical evidence from Sweden, Finland and Russia, test received ideas of child labour, through comparisons with Britain, France, Germany, Italy and Spain. Presenting the children themselves as the main protagonists, rather than the law makers, industrialists and social commentators of the time, Marjatta Rahikainen provides fresh information and perspectives, offering revelations to readers familiar only with the situation in France and Britain.

Through a rich ethnography of street and working children in Calcutta, India, this book offers the first sustained enquiry into postcolonial childhoods, arguing that the lingering effects of colonialism are central to comprehending why these children struggle to inhabit the transition from labour to schooling.

**Centuries of Child Labour** East African Publishers

This book is a comprehensive analysis of the revolutionary history of China, from the early 20th century to the present era of crisis, aided by a wealth of research which cuts across the many historical distortions both of bourgeois academia and of the Chinese Communist Party. This book answers the questions: What was the class composition and class nature of the Chinese Communist Party when it took power in 1949? What forces pushed the Mao regime, despite its explicitly class-collaborationist strategy, to take measures which were objectively socialist and to establish the Chinese workers' state? The Chinese Revolution was a practical test of both Trotsky's theory of permanent revolution and Mao's theory of uninterrupted revolution by stages. Which theory matched reality? The degeneration of the Chinese People's Republic to capitalism has been a second rigorous practical test of Trotsky's analyses. Has his prognosis that without a political revolution to overthrow the regime, a Stalinist bureaucratic state would return to capitalism, been proved correct?

*The Red Monster And Other Inovative Tale* Pearson Education India

This book explains how to bring about institutional change and foster new institutional structures (institution building) by resolving power inequities in a rural ecosystem in India, and advocates the identification of an appropriate institutional champion to make this happen. The book develops a power-asymmetry-based framework and argues that a champion with the right attributes and the 'ability' to 'convene' people over a social issue can only succeed if he/she can resolve or reduce the deep-rooted societal power asymmetries within that community. It also presents four case studies that indicate how such social change is typically spread over a long period of time.

The Red Monster is the tale of a postal runner who falls prey to a mail van.

*Working to Be Someone* Routledge

In a time when multinational corporations have become truly globalised, demands for global standards on their behaviour are increasingly difficult to dismiss. Work conditions in sweatshops, widespread destruction of the environment, and pharmaceutical trials in third world countries are only the tip of the iceberg. This timely collection of essays addresses the interface between the calls for corporate social responsibility (CSR) and the demands for an extension of international human rights standards. Scholars from a vast variety of backgrounds provide expert yet accessible accounts of questions of law, politics, economics and international relations and how they relate to one another, while also encouraging non-legal perspectives on how businesses operate within and around human rights. The result is an essential incursion for a wide range of scholars, practitioners and students in law, development, business studies and international studies, in this emerging area of human rights.

*Public Hearings on International Child Labor* Cambridge University Press

The politics of the Third Way reflects an attempt by many contemporary social democracies to forge a new political settlement which is fitted to the conditions of a modern society and new global economy, but which retains the goals of social cohesion and egalitarianism. It seeks to differentiate itself as distinct from the political ideologies of the New Right and Old Left. Though commonly linked to the US Democratic Party in the Clinton era, it can also be traced to the political discourses in European social democratic parties during the mid-1990s, most notably in France, Germany, the Netherlands, and the United Kingdom. In social policy terms the model attempts to transcend the old alternatives of the state and the market. Instead, civil society, government, and the market are viewed as interdependent and equal partners in the provision of welfare, and the challenge for government is to create equilibrium between these three pillars. The individual is to be 'pushed' towards self-help, and independent, active citizenship, while business and government must contribute to economic and social cohesion. This book provides a comprehensive and critical analysis of 'Third Way' social policy and policy processes in the welfare systems of industrialized economies, and examines the extent to which 'Third Way' ideology and institutional structures converge or vary in different national settings. It examines substantive areas of public policy in a broad comparative context of key trends and debates. By assessing the extent to which the post-war social contract in developed welfare states is being renegotiated, the text contributes to a better understanding of the current restructuring and modernization of the State. Finally the book

explores the implications of the new politics of welfare for theorizing inequality, social justice, and the future of welfare.

*Childhood and Child Labour in Industrial England* Amsterdam University Press

The articles in this volume shed light on some of the major tensions in the field of children's rights (such as the ways in which children's best interests and respect for their autonomy can be reconciled), challenges (such as how the CRC can be made a reality in the lives of children in the face of ignorance, apathy or outright opposition) and critiques (whether children's rights are a Western imposition or a successful global consensus). Along the way, the writing covers a myriad of issues, encompassing the opposition to the CRC in the US; gay parenting; Dr Seuss's take on children's autonomy; the voice of neonates on their health care; the role of NGO in supporting child labourers in India, and young people in detention and more.
