"Some artists use canvas to create a work of art. David Mellor uses a baseball field. His patterns are so precise and imaginative, I call him the Rembrandt of groundskeeping."--Bob Uecker, Milwaukee Brewers Broadcaster. Now you can transform your sports field or clubhouse lawn into an envy-grabbing work of optic art. In this book, David Mellor, currently the director of grounds for the Boston Red Sox Baseball Club, shares the turf mowing and

maintenance secrets that have made him one of the leading creators of elaborate patterns used on athletic turf nationwide. He gives you the benefit of his years of experience along with simple-to-use techniques for creating playing fields that are a cut above the rest.--From publisher description.

This book is for use in introductory courses in colleges of agriculture and in other applications requiring a problematic approach to agriculture. It is intended as a replacement for an Introduction to Agricultural Engineering by Roth, Crow, and Mahoney. Parts of the previous book have been revised and included, but some sections have been removed and new ones has been expanded to include a chapter added. Problem solving on techniques, and suggestions are incorporated throughout the example problems. The topics and treatment were selected for three reasons: (1) to acquaint students with

a wide range of applications of engineering principles to agriculture, (2) to present a selection of independent but related, topics, and (3) to develop and enhance the problem solving ability of the students. Each chapter contains educational objectives, introductory material, example problems (where appropriate), and sample problems, with answers, that can be used for self-assessment. Most chapters are self-contained and can be used independently of the others. Those that are sequential are organized in a logical order to ensure that the knowledge and skills needed are presented in a previous chapter. As principal author I wish to

express my gratitude to Dr. Lawrence O. Roth for his contributions of subject matter and guidance. I also wish to thank Professor Earl E. Baugher for his expertise as technical editor, and my wife Marsha for her help and patience. HARRY FIELD v 1 Problem Solving OBJECTIVES 1. Be able to define problem solving.
