These

are dangerous times for democracy. We live in an age of winners and losers, where the odds are stacked in favor of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the American credo that "you can make it if you try". The consequence is a brew of anger and frustration that has fueled populist protest and extreme polarization, and led to deep distrust of both government and our fellow citizens--leaving us morally unprepared to face the profound challenges of our time. World-renowned philosopher Michael J. Sandel argues that to overcome the crises that are upending our world, we must rethink the attitudes toward success and failure

that have accompanied globalization and rising inequality. Sandel shows the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind, and traces the dire consequences across a wide swath of American life. He offers an alternative way of thinking about success--more attentive to the role of luck in human affairs, more conducive to an ethic of humility and solidarity, and more affirming of the dignity of work. The Tyranny of Merit points us toward a hopeful vision of a new politics of the common good. *Back to the Future: DeLorean Time Machine* Penguin
A behind-the-scenes look at the making of the iconic Back to the Future trilogy—the

perfect movie gift for fans of the franchise, actors, writers, and filmmakers who contributed to this beloved pop culture phenomenon. Long before Marty McFly and Doc Brown traveled through time in a flying DeLorean, director Robert Zemeckis, and his friend and writing partner Bob Gale, worked tirelessly to break into the industry with a hit. During their journey to realize their dream, they encountered unprecedented challenges and regularly took the difficult way out. For the first time ever, the story of how these two young filmmakers struck lightning is being told by those who witnessed it. *We Don't Need Roads* draws from over 500

hours of interviews, including original interviews with Zemeckis, Gale, Christopher Lloyd, Lea Thompson, Huey Lewis, and over fifty others who contributed to one of the most popular and profitable film trilogies of all time. The book includes a 16-page color photo insert with behind-the-scenes pictures, concept art, and more. With a focus not only on the movies, but also the lasting impact of the franchise and its fandom, *We Don't Need Roads* is the ultimate read for anyone who has ever wanted to ride a Hoverboard, hang from the top of a clock tower, travel through the space-time continuum, or find out what really happened to Eric Stoltz after the first six weeks of

filming. So, why don't you make like a tree and get outta here—and start reading! We Don't Need Roads is your density. "What fun! Deeply researched and engagingly written...the book Back to the Future fans have been craving for decades. Geekily enthusiastic and chock full of never-before-heard tales of what went on both on and off the screen, We Don't Need Roads is a book worthy of the beloved trilogy itself."—Brian Jay Jones, author of the national bestseller *Jim Henson: The Biography* "A very compelling and enjoyable history of our trilogy. For me, reading it was like going back in time. And—Great Scott—there were even a few anecdotes that

I'd never heard!"—Bob Gale, co-creator, co-producer, and co-writer of the Back to the Future trilogy

A critical examination of the cultural, cinematic, and historical contexts of the Back to the Future trilogy, this book provides a multi-focal representation of the trilogy from several interdisciplinary fields, including philosophy, literature, music, pop culture, and media and gender studies. Topics include sexual symbolism in the trilogy and the oedipal plotting of the first film; nostalgia and the suburban dream in the cultural climate of the 1980s; generic play and performance throughout the trilogy; the emotional and narrative force provided by the films' renowned musical scores; the trilogy's post-modern references and

allusions to the Western genre; female representations across the trilogy; and the Lacanian philosophical constructs in the characterizations of Doc Brown and George and Marty McFly.
