According to the website of The Velominati, the self-professed Keepers of the Cog, the optimal number of bikes owned is $n + 1$, where n is the number of bikes owned. But there's also an important corollary, $s-1$, where s is the number of

bikes that will cause your wife or partner to leave you.' Into the Suffersphere: Cycling and the Art of Pain is a brilliantly witty account of one former racer's exploration of whether cycling is the one sport that pushes its participants to the very limits of human endurance, and delves painfully into the role that physical and mental suffering can play in this elite endurance sport. Drawing together

sporting history and pro-cycling interviews, and investigating current medical, business and psychological theories, this is the story of the extraordinary lengths to which minds and bodies can be pushed. Peppered with recollections from the author's own racing experiences and offering a fascinating insight into the unique allure of pain in a sporting context, Into

activities. Self-
regulation
manifests
itself in the
form of by-
laws, and
encompasses
organizational
provisions,
disciplinary
rules, and
rules of play.
However, the

trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following

a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific

level. Lawyers representing parties with interests in Italy will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law. **Japanese Imperialism: Politics and Sport in East Asia** Kluwer Law International B.V. This collection of essays assesses the significance of sport for the European avant-garde in the first half of

the 20th century from an international and interdisciplinary perspective. It shows the extent to which avant-garde art and culture was shaped by the dynamic encounter with modern sports. The Ethics of Sport Routledge We live in a "museum age," and sport museums are part of this phenomenon. In this book, leading international sport history scholars

examine sport museums including renowned institutions like the Olympic Museum in the Swiss city of Lausanne, the Babe Ruth Birthplace and Museum in Baltimore, the Marylebone Cricket Club Museum in London, the Croke Park Museum in Dublin, and the Whyte Museum in Banff. These institutions are examined in a broad context of understanding sport museums as an identifiable

genre in the "museum age", and more specifically in terms of how the sporting past is represented in these museums. Historians explain, debate and critique sport museums with the intention of understanding how this important form of public history represents sport for audiences who see museums as institutions that are inherently reliable and

trustworthy.

The Routledge
Handbook of

Sport History is a new and innovative survey of the discipline of sport history. Global in scope, it examines the key contemporary issues in sports historiography, sheds light on previously ignored topics, and sets an intellectual agenda for the future development of the discipline. The book explores both traditional and non-traditional methodologies in sport history, and traces the

interface between sport history and other fields of research, such as literature, material culture and the digital humanities. It considers the importance of key issues such as gender, race, sexuality and politics to our understanding of sport history, and focuses on innovative ways that the scholarship around these issues is challenging accepted discourses. This is the first handbook to include a full

section on Indigenous sport history, a topic that has often been ignored in sport history surveys despite its powerful upstream influence on contemporary sport. The book also reflects carefully on the central importance of sport history journals in shaping the development of the discipline. This book is an essential reference for any student, researcher or scholar with

an interest in sport history or the relationship between sport and society. It will also be fascinating reading for any historians looking for fresh perspectives on contemporary historiography or social and cultural history.

Sport and the European Avant-Garde (1900-1945)

Lausanne, Switzerland : International Olympic Committee Sports are more than just "games". They

can unite countries, start wars, and revolutionize views on race, class, and gender. Through works from philosophy, sociology, medicine, and law, this collection explores intersections of sports and ethics, and identifies the immense role of sports in shaping and reflecting social values

The Lausanne architects Mann Capua Mann have been active since 1991. Their mottoes are: Distill the

answers for the concrete project from the elements on site. Design spaces that, for all their dynamism, are organized in a manner that is clear to the users. Utilize materials that are in harmony with the surroundings. Their structures are compelling thanks to the variety of their views, the diversity of their light effects, and the expressive simplicity of their spatial effects. This

monograph is being published in the Collection Archigraphy Lémaniques, which is under the general editorship of Bruno Marchand. It offers for the first time a solidly based and thoroughgoing overview of the activity of the firm, which has distinguished itself in the Western Swiss architecture scene with its small but sophisticated body of work. Graeme Mann and Patricia Capua Mann are founding

members of the Forum d'Architecture s de Lausanne. In the 2006/07 semester, they served as visiting professors at the École Polytechnique Fédérale de Lausanne (EPFL). *Military Medicine* Rowman & Littlefield This book examines doping in Germany, with primary attention given to West Germany, from 1950 to the present, including what societal, cultural, and

This book offers different insights into the study of the Olympic movement in the Middle East and North Africa (MENA) region. It seeks to capture how political and cultural

This cutting edge

collection presents a political reading of the power of modern sport in Asia. Providing an interdisciplinary study of political and cultural tensions in Asia, past and present, through the key case-study of sport, it illuminates the complex practices and legacies of Japanese imperialism across East and Southeast Asia through the 20th century and beyond. Focusing on the deep

background to contemporary dynamics of intraregional tensions, it examines sport both as a tool of imperialism and as an agent of reconciliation as the region gears up to the 2020 Olympics in Tokyo. Offering a unique contribution to East Asian Studies, Colonial and Postcolonial Studies and Sport Studies, this work represent key reading for students and scholars of East Asian

studies, International Politics and Sports Diplomacy. Canadian Periodical Index Penguin The protection of jobs and labour law standards achieved by employees in the past has been under pressure from neoliberalization forces for many years. The focused perspectives evident in this original collection of essays go a long way toward clearly defining where labour law and social security law

must set their sights in order to preserve fair and productive employer-employee relations in the new world of work. Distinguished researchers study the changing realities confronting the labour market, in public policy as well as in industrial relations. Issues and topics include the following:
- integration of immigrants into industrial relations;
- the social situation of migrant

<p>workers; - new phenomena brought by the digital age; - temporary agency work; - harmonizing family and working lives; - sport and labour law; - the role of European Works Councils; and - social and labour reforms. Throughout this book, the contributors emphasize the changing role of the state and reform agendas. Although the central focus is on Europe, there is an</p>	<p>abundance of comparative detail, allowing for global application.
