Patients with peripheral vascular disease (PVD) are at increased risk of death when compared with age-matched healthy controls. They are also, whether symptomatic or not, six times more likely to die within ten years when compared to patients without the disease. This excess mortality exists even if coronary artery disease is not clinically present, and makes the treatment of PVD a highly important and pressing topic. In this fully up-to-date text, Dr. Mukherjee and his excellent team of twenty-one contributors present the reader with all of the currently available clinical information for treating PVD patients effectively.

Created by world-renowned programming instructors Paul and Harvey Deitel, *Visual Basic 2008 How to Program, Fourth Edition* introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII. AUDIENCE: Appropriate for anyone interested in learning programming with Visual Basic 2008.

Reading And Rhyme Haynes Manuals N. America, Incorporated Jack, Keiko, and Arty are back in the exciting second installment of the Rafters series. At the conclusion of the first book, the gang was unable to find Jack's older brother, Ben, who'd fallen overboard while riding the magic raft down the Dunmoore River. Book two begins with Jack and Keiko returning to the fair grounds to look for the old junk dealer who'd sold them the raft. Although the man is nowhere to be found, the kids find an old map they believe holds the secret to Ben's whereabouts. Despite their last frightening trip down river, Jack, Keiko, and Arty return for more thrills on their magical raft, only to discover that the map they've

placed their faith in transports them to a place from which they may never return! Will Jack find Ben? Will the kids discover the identity of the old man who sold them the raft? These questions and others are finally revealed in this gripping new installment of Rafters!

A New Statesman best book of the year | New York Times Editors' Choice pick A Financial Times best economics book of 2019 An accessible, story-driven look at the future of the global economy, written by a leading expert To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond in his globe-trotting book. From a prison in rural Louisiana where inmates purchase drugs with prepaid cash cards to the poorest major city on earth, where residents buy clean water in plastic bags, from the world's first digital state to a prefecture in Japan whose population is the oldest in the world, how these extreme economies function—most often well outside any official oversight—offers a glimpse of the forces that underlie human resilience, drive societies to failure, and will come to shape our collective future. While the people who inhabit these places have long been dismissed or ignored, *Extreme Economies* revives a foundational idea from medical science to turn the logic of modern economics on its head, arguing that the outlier economies are the place to learn about our own future. Whether following Punjabi migrants through the lawless Panamanian jungle or visiting a day-care for the elderly modeled after a casino, Davies brings a storyteller's eye to places where the economy has been destroyed, distorted, and even turbocharged. In adapting to circumstances that would be unimaginable to most of us, the people he encounters along the way have helped to pioneer the economic infrastructure of the future. At once personal and keenly analytical, *Extreme Economies* is an epic travelogue for the age of global turbulence, shedding light on today's most pressing economic questions.

'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, Observer Book of the Year Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her – the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here – Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.
