BRADFORD BRADSHAW

A Guide to Renovating the Bridgeport 2J Variable Speed Milling Machine Haynes Manuals N. America, Incorporated

Vols. for 1970-71 includes manufacturers' catalogs.

Moore's Rural New-Yorker Wiley

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Thomas Register of American Manufacturers and Thomas Register Catalog File McGraw Hill Professional

ILION Industrial Services is pleased to announce this brand new renovation manual which is written specifically for the Bridgeport 2J variable speed mills. If you are planning on refurbishing your Bridgeport Series 1 "2J" or "2J2" Mill or if you are out in the market looking for a good used Bridgeport, then this manual is a great place to start. "A Guide to Renovating the Bridgeport 2J Variable Speed Milling Machine"; our 152 page soft-cover shop manual, is fully illustrated with over 400 B&W photographs and diagrams, plus step-by-step instructions for disassembling, cleaning, reassembling and adjusting all of the critical components of the variable speed 2J milling machine.

The manual also illustrates the difference in the various models and provides guidance for evaluating a used machine before you purchase. Bridgeport never produced a full blown maintenance manual for their mills so this is the closest you will come to a step-by-step guide. The typeface of the manual is printed two points larger than normal for those of us who prefer to work at the bench without the use of our reading glasses. The instructions are simple and easy to follow... no prior machinery renovation experience is required. Though the Bridgeport is an industrial machine, it is well suited for the home garage shop or small business and the task of loacting one, getting it home and placing it back in service is not as expensive or challenging as you may think. Let us show you how. If you are interested in the original Bridgeport J Head (the Step-Pulley model), please check out our other books.

RajB KNRao Conference Director, Birmingham Polytechnic Condition Monitoring and Diagnostic Engineering Management (COMADEM) is a relatively new field that has already made its mark in a wide range of industries. But all the signs are that even more will be required of researchers in the field over the next decade, for COMADEM directly addresses a whole range of issues that are likely to become increasingly important to companies as competitiveness increases along with the uncertainties resulting from rapid technological change. Already for example, businesses are having to scrutinize the economics of plant and machinery in greater detail than ever before; reliability is becoming a crucial factor as the costs of unscheduled breakdowns rise and there is increasing pressure on companies to demonstrate and assure improved health and safety conditions, especially in light of the growing number of catastrophic accidents that have occurred throughout the world.

Because it offers solutions to these and similar problems, COMADEM is now gaining an international reputation as a problem-solving, user-friendly and financially beneficial multi-discipline with immense potential. Many people at the senior management level are now convinced that COMADEM has much to offer and are wasting no time in reaping maximum benefit from the latest developments. The fact that the first UK informal seminar on COMADEM - COMADEM 88 - proved to be a great success and had a truly international flavour reflected this growing interest in the new field.
