Lorsqu'au début de 1560, le très jeune Khaled est enrôlé de force dans les janissaires du sultan Soliman II le Magnifique, il ne sait pas encore quel extraordinaire destin sera le sien. Soumis à une dure discipline parmi les enfants soldats de la Sublime Porte, Khaled connaîtra les combats, les privations, la guerre et toutes ses horreurs. Ayant acquis des qualités de combattant, il obtiendra quelques privilèges, puis profitera de la confusion lors de la bataille de Lépante pour fuir le despotisme de l'Empire Ottoman. Devenu un fameux pirate, craint et respecté sur la Méditerranée et la Mer Egée, Khaled, qui ne veut plus porter ce nom, recherchera ses vraies origines, tout en se taillant un empire maritime et en créant une puissante Fraternité. Mais cet homme né de la guerre et vivant de la piraterie saura-t-il échapper aux terribles démons qui l'assaillent lorsque, adulé par les uns, haï par tant d'autres, il partira à la recherche de lui-même ?

Essais Sur Les Moeurs Et L'esprit Des Nations Simon and Schuster
The wine industry appears to be an anomaly within the modern global economy. Thousands of small companies provide a vast variety of highly differentiated products and compete successfully

with multinational corporations. Using case studies from Bordeaux, Napa Valley and Chianti Classico, this book argues that rather than being a vestige or a serendipitous phenomenon, this variety results from a sophisticated alternative organization of production. Integrating differentiation and branding into Ostrom's common pool resource theory, Jerry Patchell shows how winegrowers in a territory can use self-governance to protect and promote their common reputation while enhancing each producer's ability to differentiate their wines and build their own brand. Bordeaux, Napa, and Chianti Classico share several common challenges, but develop a set of strategies and tools appropriate to their markets and regulatory contexts.

This edited collection examines the formation of urban networks and role of gateways in Europe from the Middle Ages to the modern world. In the past, gateway cities were merely perceived as transport points, only relevant to maritime shipping. Today they are seen as the organic entities coordinating the allocation of resources and supporting the growth, efficiency and sustainability of logistics (including both the transport and distribution of goods and services). Using different historical case studies, the authors

consider how logistics shaped urban networks and were shaped by them.
