## DOYLE ALICE

**The Asian American Movement** Rutgers University Press  
Despite extensive and continuous academic interest in migrant and transnational families, a stereotypical view that those leading mobile lives are somehow beyond the contours of normativity is still prevalent. Such a perspective concerns both kinship and family practices of "familyhood" across borders, and the bi- or multicultural settings of providing or offering care. Consequently, we primarily hear about migration leading to broken relationships, the dissolution of families and bonds, substandard provisions of care, abandonment, exploitation of employees and so on. In this climate of public imagination of migrants either being "dangerous" or concurrently stealing one's job and scrounging off the welfare state, it is no small feat to be a migration scholar. Trying to overcome the universalising views that essentialise human experience requires a wholly different point of departure, one which is represented in this volume. This is because a now well-established transnational paradigm allows for a more nuanced analysis, originating with the premise that not only normalises mobility, but also proves that various ties and relationships can be continued in the long-term despite spatial distance. On the whole, the transnational lens provided here showcases how new family practices are devised and deployed in mobile family lives, thus allowing the argument that migration enriches certain dimensions of contemporary family life and caregiving. This book plays on the dichotomy of migration as "the new normal" and mobility as a continuous source of challenges. The core issues examined here concern such problems as maintaining kinship ties across borders, new patterns of mothering and fathering, children's sense of belonging and identifications, and social capital and engagement in community life. It reveals that "doing family" in the migration context often eludes simple definitions of national space or typical family. Instead, it offers a transnational understanding of how a person practically and pragmatically arranges one's family and kinship, strategically choosing pathways of care, child-rearing, relationships at home, maintaining traditions and so forth.

Scholars in many fields increasingly find themselves caught between the academy, with its demands for rigor and objectivity, and direct engagement in social activism. Some advocate on behalf of the communities they study; others incorporate the knowledge and leadership of their informants directly into the process of knowledge production. What ethical, political, and practical tensions arise in the course of such work? In this wide-ranging and multidisciplinary volume, leading scholar-activists map the terrain on which political engagement and academic rigor meet. Contributors: Ruth Wilson Gilmore, Edmund T. Gordon, Davydd Greenwood, Joy James, Peter Nien-chu Kiang, George Lipsitz, Samuel Martínez, Jennifer Bickham Mendez, Dani Nabudere, Jessica Gordon Nembhard, Jemima Pierre, Laura Pulido, Shannon Speed, Shirley Suet-ling Tang, João Vargas  
*Gender Violence in Peace and War* Rutgers University Press  
Deportes uncovers the hidden experiences of Mexican male and female athletes, teams and leagues and their supporters who fought for a more level playing field on both sides of the border. They proved that they could compete in a wide variety of sports at amateur, semiprofessional, Olympic and professional levels.

**Rethinking Latin American Social Movements** John Wiley & Sons

*Immigrant Families* aims to capture the richness, complexity, and diversity that characterize contemporary immigrant families in the United States. In doing so, it reaffirms that the vast majority of people do not migrate as isolated individuals, but are members of families. There is no quintessential immigrant experience, as immigrants and their families arrive with different levels of economic, social, and cultural resources, and must navigate various social structures that shape how they fare. *Immigrant Families* highlights the hierarchies and inequities between and within immigrant families created by key axes of inequality such as legal status, social class, gender, and generation. Drawing on ethnographic, demographic, and historical scholarship, the authors highlight the transnational context in which many contemporary immigrant families live, exploring how families navigate care, resources, expectations, and aspirations across borders. Ultimately, the book analyzes how dynamics at the individual, family, and community levels shape the life chances and wellbeing of immigrants and their families. As the United States turns its attention to immigration as a critical social issue, *Immigrant Families* encourages students, scholars, and policy makers to center family in their discussions, thereby prioritizing the human and relational element of human mobility.

Anastario investigates the social memories of rural Salvadorans from an area that was heavily impacted by the Salvadoran Civil War, which fueled a mass exodus to the U.S. By working with travelers who exchanged parcels containing food, medicine, photographs and letters, Anastario tells the story behind parcels and illuminates their larger cultural and structural significance.

Day of the Dead in the USA, Second Edition UNICEF

In summer 2014, a surge of unaccompanied child migrants from Central America to the United States gained mainstream visibility—yet migration from Central America has been happening for decades. *U.S. Central Americans* explores the shared yet distinctive experiences, histories, and cultures of 1.5- and second-generation Central Americans in the United States. While much has been written about U.S. and Central American military, economic, and political relations, this is the first book to articulate the rich and dynamic cultures, stories, and historical memories of Central American communities in the United States. Contributors to this anthology—often writing from their own experiences as members of this community—articulate U.S. Central Americans' unique identities as they also explore the contradictions found within this multivocal group. Working from within Guatemalan, Salvadoran, and Maya communities, contributors to this critical study engage histories and transnational memories of Central Americans in public and intimate spaces through ethnographic, in-depth, semistructured, qualitative interviews, as well as literary and cultural analysis. The volume's generational, spatial, urban, indigenous, women's, migrant, and public and cultural memory foci contribute to the development of U.S. Central American thought, theory, and methods. Woven throughout the analysis, migrants' own oral histories offer witness to the struggles of displacement, travel, navigation, and settlement of new terrain. This timely work addresses demographic changes both at universities and in cities throughout the United States. *U.S. Central Americans* draws connections to fields of study such as history, political science, anthropology, ethnic studies, sociology, cultural studies, and literature, as well as diaspora and border studies. The volume is also accessible in size, scope, and language to educators and community and service workers wanting to know about their U.S. Central American families, neighbors, friends, students, employees, and clients. Life at the Margins Temple University Press

This book explores the struggles that immigrant women experience when communicating with their transnational families through information and communication technologies (ICTs). Sondra Cuban recounts the fascinating stories of sixty female immigrants living in Washington state, and explores how gender, social class, nationality, and language influence their ICT usage. She addresses the emotional labor involved in interacting with the families they left behind as well as their ingenious communication systems which challenge the existing research surrounding this unique phenomenon. Early chapters of this book detail the current arguments and theories of transnational family communication in order to propose a new model thereof. Throughout, larger questions of global equality are addressed.

In *Forging Arizona* Anita Huizar-Hernández looks back at a bizarre nineteenth-century land grant scheme that tests the limits of how ideas about race, citizenship, and national expansion are forged. An important addition to extant scholarship on the U.S.

Southwest, this book recovers a forgotten case that reminds readers that the borders that divide are only as stable as the narratives that define them.

Long Journey to Justice Rutgers University Press

Few things get our compassion flowing like the sight of suffering. But our response is often shaped by our ability to empathize with others. Some people respond to the suffering of only humans or to one person's plight more than another's. Others react more strongly to the suffering of an animal. These divergent realities can be troubling—but they are also a reminder that trauma and suffering are endured by all beings, and we can learn lessons about their aftermath, even across species. With *Phoenix Zones*, Dr. Hope Ferdowsian shows us how. Ferdowsian has spent years traveling the world to work with people and animals who have endured trauma—war, abuse, displacement. Here, she combines compelling stories of survivors with the latest science on resilience to help us understand the link between violence against people and animals and the biological foundations of recovery, peace, and hope. Taking us to the sanctuaries that give the book its title, she reveals how the injured can heal and thrive if we attend to key principles: respect for liberty and sovereignty, a commitment to love and tolerance, the promotion of justice, and a fundamental belief that each individual possesses dignity. Courageous tales show us how: stories of combat veterans and wolves recovering together at a California refuge, Congolese women thriving in one of the most dangerous places on earth, abused chimpanzees finding peace in a Washington sanctuary, and refugees seeking care at Ferdowsian's own medical clinic. These are not easy stories. Suffering is real, and recovery is hard. But resilience is real, too, and *Phoenix Zones* shows how we can foster it. It reveals how both people and animals deserve a chance to live up to their full potential—and how such a view could inspire solutions to some of the greatest challenges of our time.

The History of El Salvador Harvard University Press

This book investigates the long-term impact of migration on development, engaging in a thorough analysis of the pertinent factors in migration. Migration scholars and stakeholders have long placed emphasis on the necessity of migration for development. At the heart of this book is the question: Has migration made development necessary, or is it the other way around? While existing literature is predominantly occupied with positive impressions about the migration-development nexus, this book challenges associated pervasive generalizations about the impact of migration, indicating that migration has not impacted all regions equally. This volume thus grapples with the different extents to which migration has impacted development by delving into the social costs that migrants often pay in the long run. With empirical support, this book proffers that some countries are becoming over-dependent on migration. An excellent resource for both policymakers working on migration policy, and scholars in international relations, migration and development studies, this book presents a range of innovative ideas in relation to the remittance-development nexus.

What is a beautiful garden to southern Ethiopian farmers? Anchored in the author's perceptual approach to the people, plants, land, and food, *The Edible Gardens of Ethiopia* opens a window into the simple beauty and ecological vitality of an ensete garden. The ensete plant is only one among the many "unloved" crops that are marginalized and pushed close to disappearance by the advance of farming modernization and monocultural thinking. And yet its human companions, caught in a symbiotic and sensuous dialogue with the plant, still relate to each exemplar as having individual appearance, sensibility,

charisma, and taste, as an epiphany of beauty and prosperity, and even believe that the plant can feel pain. Here a different story is recounted of these human-plant communities, one of reciprocal love at times practiced in an act of secrecy. The plot unfolds from the subversive and tasteful dimensions of gardening for subsistence and cooking in the garden of ensete through reflections on the cultural and edible dimensions of biodiversity to embrace hunger and beauty as absorbing aesthetic experiences in small-scale agriculture. Through this story, the reader will enter the material and spiritual world of ensete and contemplate it as a modest yet inspiring example of hope in rapidly deteriorating landscapes. Based on prolonged engagement with this “virtuous” plant of southwestern Ethiopia, this book provides a nuanced reading of the ensete ventricosum (avant-)garden and explores how the life in tiny, diverse, and womanly plots offers alternative visions of nature, food policy, and conservation efforts.

*Deportes* Rutgers University Press

As bloody wars raged in Central America during the last third of the twentieth century, hundreds of North American groups “adopted” villages in war-torn Guatemala, Nicaragua, and El Salvador. Unlike government-based cold war-era Sister City programs, these pairings were formed by ordinary people, often inspired by individuals displaced by US-supported counterinsurgency operations. Drawing on two decades of work with former refugees from El Salvador as well as unprecedented access to private archives and oral histories, Molly Todd’s compelling history provides the first in-depth look at “grassroots sistering.” This model of citizen diplomacy emerged in the mid-1980s out of relationships between a few repopulated villages in Chalatenango, El Salvador, and US cities. Todd shows how the leadership of Salvadorans and left-leaning activists in the US concerned with the expansion of empire as well as the evolution of human rights-related discourses and practices created a complex dynamic of cross-border activism that continues today.

The violent sport of boxing shaped and was shaped by notions of Mexican national identity during the twentieth century. This book reveals how boxing and boxers became sources of national pride and sparked debates on what it meant to be Mexican, masculine, and modern. The success of world-champion Mexican boxers played a key role in the rise of Los Angeles as the center of pugilistic activity in the United States. This international success made the fighters potent symbols of a Mexican culture that was cosmopolitan, nationalist, and masculine. With research in archives on both sides of the border, the author uses their life stories to trace the history and meaning of Mexican boxing.

*East of East: The Making of Greater El Monte*, is an edited collection of thirty-one essays that trace the experience of a California community over three centuries, from eighteenth-century Spanish colonization to twenty-first century globalization. Employing traditional historical scholarship, oral history, creative nonfiction and original art, the book provides a radical new history of El Monte and South El Monte, showing how interdisciplinary and community-engaged scholarship can break new ground in public history. *East of East* tells stories that have been excluded from dominant historical narratives—stories that long survived only in the popular memory of residents, as well as narratives that have been almost completely buried and all but forgotten. Its cast of characters includes white vigilantes, Mexican anarchists, Japanese farmers, labor organizers, civil rights pioneers, and punk rockers, as well as the ordinary and unnamed youth who generated a vibrant local culture at dances and dive bars.
