In the medieval world, geographical knowledge was influenced by religious ideas and beliefs. Whereas this point is well analysed for the Latin-Christian world, the religious character of the Arabic-Islamic geographic tradition has not yet been scrutinised in detail. This volume addresses this desideratum and combines case studies from both traditions of geographic thinking. The contributions comprise in-depth analyses of individual geographical works as for example those of al-Idrisi or Lambert of Saint-Omer, different forms of presenting geographical knowledge such as TO-diagrams or globes as well as

performative aspects of studying and meditating geographical knowledge. Focussing on texts as well as on maps, the contributions open up a comparative perspective on how religious knowledge influenced the way the world and its geography were perceived and described in the medieval world.

Customers in North America who wish to purchase this publication, please contact Augsburg Fortress Press. First published in 1992, Emanuel Tov's Textual Criticism of the Hebrew Bible has rapidly established itself as the authoritative reference work for all those engaged in the study of the text of the Hebrew Bible. This thoroughly revised second edition will be welcomed by students and scholars alike. A wide range of readers will find this book accessible and indispensable. Emanuel Tov offers extensive descriptions of the major witnesses to the text of the Hebrew Bible-the Hebrew texts from Qumran, the Septuagint, the Masoretic Text-as well as the Aramaic Targumim, the Syriac translations, the Vulgate, and others. Special attention is given to

the exegetical aspects of the textual transmission, literary issues, and the problem of the original shape of the biblical text. Praise for the First Edition: "Emanuel Tov is preeminent in the world in the field of Septuagint studies. This is a solid and durable work which, given its technical character, is written in a readable way." Frank Moore Cross, Harvard University "Nowhere else can you find such a thorough presentation of how the Bible was transmitted in Second Temple times ... This excellently written handbook represents a major step forward for biblical studies." Lawrence Schiffman, New York University "History will surely regard Emanuel Tov's monumental work as the definitive discussion of textual criticism of this generation. A 'must-have' for any serious scholar of the Bible!" Sidnie A. White, University of Nebraska "The basic reference work on the textual criticism of the Hebrew Bible for at least the next decade. This is a magisterial work which is badly needed and masterfully done." Journal for the Study of Judaism "This book will soon be viewed as a classic of biblical studies." Ralph W. Klein, Journal of Religion "Replete with examples, tables, plates, lucid definitions and explanations, as well as extensive bibliographies, the volume brings together a wealth of information not previously so accessible and makes the theory and practice of textual criticism easily understandable and visually clear." Judith E. Sanderson, Seattle University

After a short review of the history of research, the work introduces and delimits the concepts related to grammaticalization. It then provides extensive exemplification of grammaticalization phenomena in diverse languages, ordered by grammatical domains such as the verbal, pronominal and

nominal sphere and clause level relations. The final chapter presents a theory of grammaticalization which is based on the autonomy of the linguistic sign with respect to the paradigmatic and syntagmatic axes. This is the basis of the structural parameters that constitute grammaticalization. They are operationalized to the point of rendering degrees of grammaticalization measurable. A woman approaching the 'invisible years' of middle age abandons her failing writing career to retrain as a chiropodist in the East Berlin suburb of Marzahn, once the GDR's largest prefabricated housing estate. From her intimate vantage point at the foot of the clinic chair, she observes her clients and co-workers, listening to their stories with empathy and curiosity. Part memoir, part collective history, Katja Oskamp's love letter to the inhabitants of Marzahn is a tender reflection on life's progression and our ability to forge connections in the unlikeliest of places. Each person's story stands alone as a beautifully crafted vignette, but together they form a portrait of a community.

Lexicography, together with grammatical studies and textual criticism, forms the basis of biblical exegesis. Recent decades have seen much progress in this field, yet increasing specialization also tends to have the paradoxical effect of turning exegesis into an independent discipline, while leaving

lexicography to the experts. The present volume seeks to renew and intensify the exchange between the study of words and the study of texts. This is done in reference to both the Hebrew source text and the earliest Greek translation, the Septuagint. Questions addressed in the contributions to this volume are how linguistic meaning is effected, how it relates to words, and how words may be translated into another language, in Antiquity and today. Etymology, semantic fields, syntagmatic relations, word history, neologisms and other subthemes are discussed. The main current and prospective projects of biblical lexicology or lexicography are presented, thus giving an idea of the state of the art. Some of the papers also open up wider perspectives of interpretation.

This book offers a comprehensive exploration of Steiner or Waldorf pedagogy and practice in schools. Drawing on key research, it traces the origins of Steiner education from the original Waldorf school and shows how this approach has since been adapted and applied in educational settings around the world. Outlining the educational philosophy of Steiner education, the book considers its unique features, such as its commitment to a pedagogical anthropology that takes the whole developing human being into account – body, mind and spirit – and the developmental approach that arises out of this. It sets out the specific curriculum and teaching approach alongside vignettes of teaching and learning situations adopted in Steiner educational settings to show how the approach works in practice. Offering a critical perspective on this teaching style, Rawson examines the contributions that Steiner education has made in different

cultures and looks towards future developments in China and other Asian countries. Considering all aspects of Steiner education, this book is essential reading for anyone wanting to understand the fundamental elements of this approach and its continuing relevance within the educational landscape.

What makes a picture offensive to some people and not to others? In diverse, pluralistic societies around the world, images are triggering heated controversy as never before. Their study offers a perfect entry point into the clashes between different values, ideas, and sensibilities. How is the relation between regimes of visibility in art, journalism, politics, and religion negotiated in plural settings? Situated at the interface of art history, anthropology and religious studies, this volume unravels the dynamics of taking offense in current politics and aesthetics of cultural representation in Europe and beyond.

In this volume, Israel Finkelstein studies the world of ancient Israel, including the time-frame for the composition of historiographic texts in the Bible. He discusses key questions such as historical realities behind North Israelite traditions, the impact of Israel on late monarchic Jerusalem, the scope of

composition of texts in the Persian period, and the legitimacy needs of the Hasmoneans.

Education, spirituality and creativity help to navigate possible courses of action, in a life marked by commercialization and loss of meaning. Education that promotes knowledge and managing information while neglecting autonomous cognition and creative action can be found everywhere. On the other hand, education, spirituality and creativity are essential for a life led with awareness, empathy and criticism that are reflected upon in the present anthology by authors from Brazil and Europe. They inspire new educational approaches and encourage immersing oneself in undefined and uncertain phenomena. Karduniaš, as the kingdom of the Kassites in Babylonia was called in ancient times, was the neighbor and rival of great powers such as Egypt, the Hittites, and Assyria. But while our knowledge of the latter kingdoms has made huge progress in the last decades, the Kassites have until recently been largely ignored by modern scholarship. Recently a number of scholars have embarked on research into different aspects of Late Bronze Age Babylonia. The desire to share the results of these new investigations resulted in an international conference, which was held at Munich University in July 2011. The presentations given at this meeting have been revised for publication in the current volume. This book gives an overview of current research on the Kassites and is the first larger survey of their culture ever. An invaluable introduction by Kassite expert Professor John A. Brinkman is followed by

seventeen specialist contributions investigating different aspects of the Kassites. These include detailed historical, social, cultural, archaeological, and art historical studies concerning the Kassites from their first arrival in Mesopotamia, during the period when a Kassite Dynasty ruled Babylonia (c. 1595-1155 BC), and in the subsequent aftermath. Concentrating on southern Mesopotamia the contributions also discuss Kassite relations and presence in neighboring regions. The book is completed by a substantial bibliography and a detailed index.
