Only fragments of historical text from China's middle period have been translated into English, until now. Here at last is the first major Chinese historical work from the Song dynasty. Written by Ouyang Xiu, an intellectual giant of the eleventh century, this is a history of the preceding century (907--979), a period known as the Five Dynasties. The historical and literary significance of Ouyang's achievement cannot be underestimated. In rewriting the existing official history of the Five Dynasties, Ouyang -- whose own time was characterized by extraordinary intellectual and political innovation -- made several notable decisions. He rewrote the history

in the "ancient" style preferred by forward-thinking literati; he even rewrote the original documents quoted within biographies. He also relied on his own moral categories, reevaluating the worth of the historical figures in light of his own convictions that individuals should take personal responsibility for the fate of society. Ouyang's history would eventually become the official version -- the last state-sanctioned dynastic history of imperial China to be written by an individual in a private capacity. In addition to its provocative insights and lucid presentation, Historical Records of the Five Dynasties is an eloquent statement on the art of historical writing in the eleventh century. A preeminent scholar of Chinese history, Richard L. Davis has provided a

thorough introduction and rendered nearly two-thirds of the Chinese original into English, including complete sections critical to understanding the politics and personalities of the time. Biographical clusters based on Ouyang's moral categories also appear in full, helping readers to appreciate the Confucian agenda that informs the work.

As the first European to travel extensively throughout Asia, Marco Polo was the earliest bridge between East and West. His famous journeys took him across the boundaries of the known world, along the

dangerous Silk Road, and into the court of Kublai Kahn, where he won the trust of the most feared and reviled leader of his day. Polo introduced the cultural riches of China to Europe, spawning centuries of Western fascination with Asia. In this lively blend of history, biography, and travelogue, acclaimed author Laurence Bergreen separates myth from history, creating the most authoritative account yet of Polo's remarkable adventures. Exceptionally narrated and written with a discerning eye for detail, Marco Polo is as riveting as the life it describes.

This innovative book proposes that what we think of as "moral conscience" is essentially the exercise of reflective judgment on the goods and ends arising in interpersonal relations, and that such judgment constitutes a form of taste. Through an historical survey Mitchell shows that the constant pendant to taste was an educational and cultural ideal, namely, that of the gentleman, whether he was an ancient Greek citizen-soldier, Roman magistrate, Confucian scholar-bureaucrat, Renaissance courtier, or

Victorian grandee. Mitchell argues that it was neither an ethical doctrine nor methodology that provided the high cultures with moral and political leadership, but rather an elite social order. While the gentry in the traditional sense no longer exists, it nevertheless made significant historical contributions, and insofar as we are concerned to understand the present state of human affairs, we need to grasp the nature and import of said contributions.

* The ocean as you've never seen it before, caught by the camera of renowned seascape photographer Bob Tabor* Stunning photographs that are stylized to intensify the power of the waves* The perfect gift for anyone who loves the sea This collection of nature photography has a poetic purpose in mind. These images convey the sea's raw power, its constructive and destructive force. Each picture is reflected back on itself, flipped or curved, the waves like works of sculpture that extend into infinity. Tabor's ingenious method captures the spirit of the wave by breaking it into its physical

elements. He crops the most energetic section of the surf and, by eliminating the horizon line, deprives the picture of any sense of scale. He heightens chromatic contrasts until these waves dominate the image - there is only the fluid burst of spray and the flash of reflected light off the water. The results are undeniable: dynamic three-dimensional explosions seem to surge off the page, and it is hard to believe these waves aren't moving. Splash will bring the ocean to you.

Through engaging photos and musings, Husna Kassim documents a memoir of a debut journey of a group of over-sixties old friends travelling through Siberia and the Balkan states on the Trans Mongolian Express, the Balkan Express, and other less-exotic trains. This book is about memories they created, memories rekindled, people they met on the trains and in the cities while journeying from Beijing to Moscow (through Mongolia), St Petersburg, Tallinn, Warsaw, Budapest and Zagreb. Savouring scenic Russia and fascinating Mongolia with its wild horses grazing on the steppes and fleeting images of yurts/gers dotting the horizon;

discovering cities, and seizing moments on the lens, kept the group energised throughout the entire journey. What started out as an awkward mix of characters, bound for a falling-out, resulted in a colourful travel experience of a life time, sometimes punctuated by amusing episodes of miscommunication but always pulling through in comradeship. A journey such as this, with its challenges and opportunities, allows the traveler to discover who she really is, in a way only the road brings.

Award-winning author Guy Gavriel Kay evokes the dazzling Tang Dynasty of 8th-century China in a masterful story of honor and power. It begins simply. Shen Tai, son of an illustrious general serving the Emperor of Kitai, has spent two years honoring the memory of his late father by burying the bones of the dead from both armies at the site of one of his father's last great battles. In recognition of his labors and his filial piety, an unlikely source has sent him a dangerous gift: 250 Sardinian horses. You give a man one of the famed Sardinian horses to reward him greatly. You give him four or five to exalt him above his

fellows, propel him towards rank, and earn him jealousy, possibly mortal jealousy. Two hundred and fifty is an unthinkable gift, a gift to overwhelm an emperor. Wisely, the gift comes with the stipulation that Tai must claim the horses in person. Otherwise he would probably be dead already...

The Meaning of Horses: Biosocial Encounters examines some of the engagements or entanglements that link the lived experiences of human and non-human animals. The contributors discuss horse-human relationships in multiple contexts, times and places, highlighting variations in the meaning of horses as well as universals of 'horsiness'. They consider how horses are unlike other animals, and cover topics such as commodification, identity, communication and performance. This collection emphasises the agency of the horse and a need to move beyond anthropocentric studies, with a theoretical approach that features naturecultures, co-being and biosocial encounters as interactive forms of becoming. Rooted in anthropology and multispecies ethnography, this book introduces new

questions and areas for consideration in the field of animals and society.

The Horsemen of Israel Chicago Review Press

Almost every book in the Hebrew Bible mentions horses and chariots in some manner, usually in a military context. However, the importance of horses, chariots, and equestrians in ancient Israel is typically mentioned only in passing, if at all, by historians, hippologists, and biblical scholars. When it is mentioned, the topic engenders a great deal of confusion. Notwithstanding the substantial textual and archaeological evidence of the horse's historic presence, recent scholars seem to be led by a general belief that there were very few horses in Iron Age Israel and that Israel's chariotry was insignificant. The reason for this current sentiment is tied primarily to the academic controversy of the past 50 years over whether the 17 tripartite-pillared buildings excavated at Megiddo in the early 20th century were, in fact, stables. Although the original excavators, archaeologists from the University of Chicago, designated these buildings as stables, a number of scholars (and a few archaeologists) later

challenged this view and adopted alternative interpretations. After they "reassessed" the Megiddo stables as "storehouses," "marketplaces," or "barracks," the idea developed that there was no place for the horses to be kept and, therefore, there must have been few horses in Israel. The lack of stables, when added to the suggestion that Iron Age Israel could not have afforded to buy expensive horses and maintain an even more expensive chariotry, led to a dearth of horses in ancient Israel; or so the logic goes that has permeated the literature. Cantrell's book attempts to dispel this notion. Too often today, scholars ignore or diminish the role of the horse in battle. It is important to remember that ancient historians took for granted knowledge about horses that modern scholars have now forgotten or never knew. Cantrell's involvement with horses as a rider, competitor, trainer, breeder, and importer includes equine experience ranging from competitive barrel-racing to jumping, and for the past 25 years, dressage. The *Horsemen of Israel* relies on the author's knowledge of and experience with horses as well as her expertise in the field of

ancient Near Eastern languages, literature, and archaeology.

Over the last 2,000 years, critical innovations have transformed small regions into global powers. But these powers have faded when they did not embrace the next big innovation. Gerard J. Tellis and Stav Rosenzweig argue that openness to new ideas and people, empowerment of individuals and competition are key drivers in the development and adoption of transformative innovations. These innovations, in turn, fuel economic growth, national dominance and global leadership. In *How Transformative Innovations Shaped the Rise of Nations*, Tellis and Rosenzweig examine the transformative qualities of concrete in Rome; swift equine warfare in Mongolia; critical navigational innovations in the golden ages of Chinese, Venetian, Portuguese and Dutch empires; the patent system and steam engine in Britain; and mass production in the United States of America.

Hardly anyone paid attention when Sultan Khan arrived in London on April 26, 1929.

A humble servant from a village in the Punjab, Khan had little formal education and barely spoke English. He had learned the rules of Western chess only three years earlier, yet within a few months he created a sensation by becoming the British Empire champion. Sultan Khan was taken to England by Sir Umar Hayat Khan, an Indian nobleman and politician who used his servant's successes to promote his own interests in the turbulent years before India gained independence. Sultan Khan remained in Europe for the best part of five years, competing with the leading chess players of the era, including World Champion Alexander Alekhine and former World Champion Jose Raoul Capablanca. His unorthodox style often stunned his opponents, as Daniel King explains in his examination of the key games and tournaments in Khan's career. Daniel King has uncovered a wealth of new facts about Khan, as well as dozens of previously unknown games. For the first time he tells the full story of how Khan, a Muslim outsider, was received in Europe, of his successes in the chess world and his return to obscurity after his departure for India in 1933.

The Magic of Horses McFarland
USA Today best-selling author High-stakes politics and the rivalry between two powerful women in the trial of the century
Legendary defense attorney Raquel Rematti represents a presidential candidate—and former First Lady of an ISIS-assassinated President—Senator Angelina Baldesteri in the most watched and explosive trial of the 21st Century. The Senator, a Democrat, sees it as a vendetta show trial orchestrated by the current Republican US President, his Republican Attorney General, and an ambitious Republican United States Attorney in Manhattan. At the trial, a year before the election, the Senator faces charges of election fraud, tax evasion, and money laundering; each of which could deem her unfit for office and all but remove her from the Presidential race. As the epic trial unfolds, Raquel is staggered by her client's naked ambition and the extent of the complex relationships the Senator keeps hidden in a mounting trail of lies. Every aspect of the Senator's life is inundated with intrigue. When the swirling forces start getting lethal, Raquel needs to extricate herself from the venom of these

illicit and treacherous connections. These two powerful women keep things professional in the courtroom under the eyes of a crusty old judge, but once outside, they pit themselves against each other, warrior to warrior. At the end, only one will be left standing.

Looking for Marco Polo New In Chess
Blending the iconoclastic feminism of The Notorious RBG and the confident irreverence of Go the F**ck to Sleep, a brazen and empowering illustrated collection that celebrates inspirational badass women throughout history, based on the popular Tumblr blog. Well-behaved women seldom make history. Good thing these women are far from well behaved . . . Illustrated in a contemporary animation style, Rejected Princesses turns the ubiquitous "pretty pink princess" stereotype portrayed in movies, and on endless toys, books, and tutus on its head, paying homage instead to an awesome collection of strong, fierce, and yes, sometimes weird, women: warrior queens,

soldiers, villains, spies, revolutionaries, and more who refused to behave and meekly accept their place. An entertaining mix of biography, imagery, and humor written in a fresh, young, and riotous voice, this thoroughly researched exploration salutes these awesome women drawn from both historical and fantastical realms, including real life, literature, mythology, and folklore. Each profile features an eye-catching image of both heroic and villainous women in command from across history and around the world, from a princess-cum-pirate in fifth century Denmark, to a rebel preacher in 1630s Boston, to a bloodthirsty Hungarian countess, and a former prostitute who commanded a fleet of more than 70,000 men on China's seas.

*Includes pictures *Includes ancient accounts of the emperor's reign and description of his tomb *Describes how the Terracotta Army was designed and created *Includes a bibliography for further reading "The terracotta army was a one-off creation, original in both concept and execution, unmentioned in any source, no sooner buried than destroyed

and forgotten. ... Why so realistic? Why this many? Why full-size? Why clay? ... The initial inspiration was the need to duplicate a new force, of which the main element was infantry, conscripted from the emperor's newly acquired masses of peasants, and protected not with custom-made armor but with scales of leather and simple, standardized weapons. It was the combination of archers, infantry and charioteers, this particular balance between officers and men, that had enabled the First Emperor to unify the nation." - John Man, *The Terracotta Army: China's First Emperor and the Birth of a Nation* China has always fascinated outsiders, much in the same way that distant light fascinates someone looking down a dark road. It is both familiar and mysterious, ancient and new, and fully understanding it seems to always remain just out of reach. From the Great Wall to the ancient teachings of Confucius, China's natural and man-made wonders have been topics of interest among Westerners since the Middle Ages and the pursuit of trade routes both by land and sea, amazing Marco Polo and 19th century British expeditions in similar ways despite

the passage of several centuries between them. For these reasons, it comes as little surprise that people across the world were excited when it was revealed in 1974 that archaeologists had uncovered a new and amazing find: an underground army consisting of thousands of clay soldiers, still standing at their posts despite being over 2,000 years old. In addition to the remarkable feats of craftsmanship and the almost unimaginable size and scale of the Terracotta Army, the sculpted statues seemed to bear testimony of something that modern people could not quite wrap their minds around, representing a time when China was born almost 200 years before Christ. The hope for many was that this remarkable army could reveal the secrets of China's first emperor, Qin Shi Huang, a man who united seven warring tribes into one of the most powerful nations on earth. Even as research continues 40 years after the initial find, some of the facts about the Terracotta Army are staggering. It's estimated that the army consists of 8,000 soldiers, 130 chariots, and hundreds of horses and cavalry, all of which were sculpted on a mass scale by various factories but were

subsequently molded to feature their own unique appearances separate of one another. As if that wasn't enough, there are also terracotta sculptures of acrobats, servants, and musicians, and the sculptures were painted (though most of the paint has faded away over time). This impressive horde of funerary art was buried with Qin Shi Huang to serve him in the afterlife, much the same way Egyptian pyramids were constructed for pharaohs. While the sculptures comprising the Terracotta Army are impressive as a work of art, they have indeed proven to be an invaluable historical source as well. Thanks to collections of weapons buried with the sculptures, as well as the shapes and sizes of the various military equipment, historians can get a sense of what Qin Shi Huang had at his disposal when he fought battles, and the Terracotta Army itself is even organized based on military rank, allowing historians a chance to understand ancient Chinese military formations. The Terracotta Army: The History of Ancient China's Famous Terracotta Warriors and Horses chronicles the history of the Chinese emperor who commissioned them and a description of

the famous funerary art. Along with pictures of important people, places, and events, you will learn about the Terracotta Army like never before.

Step into the violent world of the 13th century, where the European states of the Levant battled with Muslim powers for control of Jerusalem. At the cutting edge of the conflict were the elite fighting men of the Crusader and Egyptian armies - the Knights Templar and the Mamluks, respectively. The Templars were the most famous and formidable of the European Military Orders, while the Mamluks were a slave caste whose fighting prowess had elevated them to the point of holding real political power, threatening their Ayyubid masters who relied on them so desperately for military success. This book draws on the latest research to tell the story of three key engagements from the Fifth Crusade to the Seventh Crusade. It reveals the extraordinary ferocity with which these battles were fought, and how the struggle between Templar and Mamluk came to shape the political future of the region.

A “superb” account of the enduring connection between humans and horses—“Full of the sort of details that get edited out of more traditional histories” (The Economist). Fifty-six million years ago, the earliest equid walked the earth—and beginning with the first-known horse-keepers of the Copper Age, the horse has played an integral part in human history. It has sustained us as a source of food, an industrial and agricultural machine, a comrade in arms, a symbol of wealth, power, and the wild. Combining fascinating anthropological detail and incisive personal anecdote, equestrian expert Susanna Forrest draws from an immense range of archival documents as well as literature and art to illustrate how our evolution has coincided with that of horses. In paintings and poems (such as Byron’s famous “Mazeppa”), in theater and classical music (including works by Liszt and Tchaikovsky), representations of the horse have changed over centuries, portraying the crucial impact that we’ve had on each other. Forrest combines this history with her own experience in the field, and travels the world to offer a comprehensive

look at the horse in our lives today: from Mongolia where she observes the endangered takhi, to a show-horse performance at the Palace of Versailles; from a polo club in Beijing to Arlington, Virginia, where veterans with PTSD are rehabilitated through interaction with horses. "For the horse-addicted, a book can get no better than this . . . original, cerebral and from the heart." —The Times (London)
