This volume offers a loving appreciation of the aesthetic values underlying Chinese calligraphy as well as an authoritative guide to its historical development as one of China's

supreme artistic accomplishments.

The Splendour of Islamic Calligraphy Kurt Boone Books

Wall Writers explores graffiti's eruption into mainstream society in the period of social turmoil in the late 1960s and early '70s, and takes a closer look not only at early graffiti's place on the wall but its place in the culture of the time. More comprehensive than any other book on the subject, Wall Writers explores not only early graf writing itself but the writers creating it, the new technology of spray paint that made it possible, and the culture that drove them to write -- be it a need to rebel against the government, to pass a message, or simply be recognized by society. Hundreds of images of

everything from spray paint advertisements to commercial greeting cards to images of buildings completely covered in spray painted monikers are included, and reveal the context of the beginnings of a movement that would eventually grow to "transform city life, public transit, public art, and ultimately visual art the world over." Includes interviews and profiles of some of the most prolific writers of the time, including TAKI 183, Cornbread, and dozens more.

The art of Islamic calligraphy developed from the 7th to the 14th century, beginning in western Arabia, spreading south to Yemen and north to the Near East, and continuing east and west to Iran, Egypt, North Africa, and Spain. This handsome book demonstrates the breadth and beauty of Islamic calligraphy across centuries and continents, as seen in rare early folios of the Qur'an. Noted scholar David J. Roxburgh begins by discussing the Qur'an, which Muslims believe to be the written record of a series of divinely inspired revelations to the Prophet Muhammad. He then analyzes Kufic script, the preeminent vehicle for writing early manuscripts of the Qur'an; reforms of calligraphy in the 10th century; and the great master Islamic calligraphers, in particular Yaqut al-Musta'simi. The beautiful reproductions of folios and bifolios validate Roxburgh's conclusion that "the miracle of the text of the Qur'an found its equal in the technical mastery of the calligrapher's practice, a miracle in its own right."

The classic work on the music of Afrofuturism, from jazz to jungle More Brilliant than the Sun: Adventures in Sonic Fiction is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, More Brilliant than the Sun is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by

filmmaker John Akomfrah and producer Steve Goodman aka kode9.

Santiago, with its deeply evolved and extremely active underground graffiti scene, bursts at the seams with an abundance of eye-popping, jaw-dropping murals. Stencil graffiti artist Lord K2 documents 14 neighborhoods within the capital of Chile with his arresting photography and intimate conversations with local artists. Through more than 200

images and 80 interviews, learn how street art was influenced by American, European, and Brazilian graffiti and how its evolution runs parallel to the political history of the nation itself. During the Cold War, nationalist muralist brigades spread socialist idealism through symbols of power and oppression. Santiago's repressed lower classes gradually usurped the art form, and murals eventually became a weapon of resistance. This vibrant city, with its array of distinct cultural districts, now invites you to experience its fascinating and tightly knit artistic community that has flourished since the fall of Pinochet's dictatorship in 1990."

Jonathan Jones Harvard University Press Speech and writing are two organs of the same human impulse--the conveyance of thought: the one operating through hearing, the other through sight; the one by sound from mouth to ear, the other by form or image from hand to eye. But each can do something besides convey thought. Spoken words can be so arranged as to discharge aesthetic "musical" significances, as in much Western poetry. Written words can be formed to liberate visual beauties; and it is these which form the subject of this book. In addition to aesthetic considerations, the text deals with such more practical subjects as the origin and construction of the Chinese

characters, styles, technique, strokes, composition, training, and the relations between calligraphy and other forms of Chinese art.
