Coming of Age: Three Dark Novellas Springer

The Artificial Lifeterm appeared more than 20 years ago in a small corner of New Mexico, USA. Since then the area has developed dramatically, many researchers joining enthusiastically and research groups sprouting everywhere. This frenetic activity led to the emergence of several strands that are now established fields in themselves. We are now reaching a stage that one may describe as maturer: with more rigour, more benchmarks, more results, more stringent acceptance criteria, more applications, in brief, more sound science. This, which is the natural path of all new areas, comes at a price, however. A certain enthusiasm, a certain adventurousness from the early years is fading and may have been lost on the way. The field has become more reasonable. To counterbalance this and to encourage lively discussions, a conceptual track, where papers were judged on criteria like importance and/or novelty of the concepts proposed rather than the experimental/theoretical results, has been introduced this year. A conference on a theme as broad as Artificial Life is bound to be very diverse, but a few tendencies emerged. First, fields like 'Robotics and Autonomous Agents' or 'Evolutionary Computation' are still extremely active and keep on bringing a wealth of results to the A-Life community. Even there, however, new tendencies appear, like collective robotics, and more specifically self-assembling robotics, which represent now a large subsection. Second, new areas appear.

The Living Church ROSEDOG

Earthquakes rip through the world as the Creator approaches, the stars fall, the sun goes dark, and the moon proclaims death. Jesus comes and His powerful presence causes the atmosphere to split and roll away. Revelation 6 shows people wailing for the mountains to bury them: "Fall on us, and hide us from the face of Him who sits on the throne, and from the wrath of the Lamb: for the great day of His wrath is come; and who will be able to stand?" And who does stand in that day? No one. Not a single soul. It's the total annihilation of a vile, self-righteous human race. God's followers expected all of this to happen on October 22, 1844. They watched and waited, but Jesus didn't return. This was only a warning preview of His return in the sixth seal. In God's mercy, He commands to delay the cataclysm of judgment day so that He can send to the world the needed preparation for the day of wrath. That needed preparation comes with the seven trumpets of the seventh seal that occur after 1844. The postponed destruction seen in the sixth seal will yet be a future reality. The Seven Trumpets and the Investigative Judgment examines chapters 4-11 in the book of Revelation and studies how recent events since 9/11 have almost completed God's

gracious delay. This book presents a new view of Revelation that meets the biblical rules of prophetic interpretation and of the inspired "testimony of Jesus," which is "the spirit of prophecy" (Rev. 19:10). How have we done in this waiting period? Will we stand when Jesus returns? By God's grace this book will help you prepare for that great day.

The Dark is Coming was inspired by the author's real-life fear of the darkness. Athena Reid wondered if the dark could be a creature or 'monster' this is how she would imagine it to be. Athena understands that the only solution for darkness is light, which she represents in this story very vividly. It is also the belief of Athena that the light within each of us is also the solution to the darkness in this world.

IS A NEW DARK AGE COMING? As a candidate, President Biden boldly promised that America "would transition away from the oil and gas industry," replacing it with "renewable energy over time." He further doubled down on that promise by issuing executive orders on his first day in office. But has anyone really asked the question, is that possible? Fossil fuels have lifted humanity from the depths of poverty, the drudgery of manual labor, the edge of starvation and being captive to the whims of nature. The President's proposals put all of that progress at risk by the idea that renewables can replace fossil fuels and the thousands of products derived from them. Too much of the debate and discussion about energy is rampant with overly simplistic ideas and misinformation. Take a journey through history and discover how fossil fuels touch every aspect of life, making humanity wealthier, healthier, and safer. Will the proposed world of renewable energy be bright or will it usher in a coming dark age?
