"To explain the coverlet's importance as the pinnacle of the Norwegian weaver's art, Katherine Larson looks at the role textiles played in the lives of women prior to the twentieth century. She takes readers through the yearly cycle in rural Norway and relates it to the many steps of cloth production in a pre-industrial era. Larson describes traditional methods of preparing, spinning, dyeing, and weaving wool and flax, and the tools with which these tasks were performed. She devotes chapters to the different types of coverlets and their origins: tapestry, square weave, krokbragd, double weave, rya, and overshot. Numerous illustrations show patterns from ages past faithfully preserved in the coverlets of Norway. In addition, the book includes a wealth of bibliographic sources and a glossary of weaving terminology."--BOOK JACKET.
