The word
'diaspora' has

leapt from its
previously
confined use –
mainly
concerned
with the
dispersion of
Jews, Greeks,
Armenians
and Africans
away from
their natal

homelands –
to cover the
cases of many
other ethnic
groups,
nationalities
and religions.
But this
'horizontal'
scattering of
the word to
cover the

mobility of many groups to many destinations, has been paralleled also by 'vertical' leaps, with the word diaspora being deployed to cover more and more phenomena and serve more and more objectives of different actors. With sections on 'debating the concept', 'complexity', 'home and home-making', 'connections' and 'critiques', the Routledge Handbook of

Diaspora Studies is likely to remain an authoritative reference for some time. Each contribution includes a targeted list of references for further reading. The editors have carefully blended established scholars of diaspora with younger scholars looking at how diasporas are constructed 'from below'. The adoption of a variety of conceptual perspectives allows for generalization

, contrasts and comparisons between cases. In this exciting and authoritative collection over 40 scholars from many countries have explored the evolving use of the concept of diaspora, its possibilities as well as its limitations. This Handbook will be indispensable for students undertaking essays, debates and dissertations in the field. *The Androgyne in Early Modern France* Fodors Travel

in class. The headscarf crisis signaled an Islamic revival among the children of North African immigrants; it also ignited an ongoing debate about the place of Muslims within the secular nation-state. Based on ten years of ethnographic research, *The Republic Unsettled* alternates between an analysis of Muslim French religiosity and the contradictions of French secularism that this emergent

religiosity precipitated. Mayanthi L. Fernando explores how Muslim French draw on both Islamic and secular-republican traditions to create novel modes of ethical and political life, reconfiguring those traditions to imagine a new future for France. She also examines how the political discourses, institutions, and laws that constitute French secularism regulate Islam,

transforming the Islamic tradition and what it means to be Muslim. Fernando traces how long-standing tensions within secularism and republican citizenship are displaced onto France's Muslims, who, as a result, are rendered illegitimate as political citizens and moral subjects. She argues, ultimately, that the Muslim question is as much about secularism as it is about

An argument that French adoption policies reflect and enforce the state's notions of gender, parenthood, and citizenship. In May 2013, after months of controversy, France legalized same-sex marriage and adoption by homosexual couples. Obstacles to adoption and parenting equality

remain, however—many of them in the form of cultural and political norms reflected and expressed in French adoption policies. In *The Politics of Adoption*, Bruno Perreau describes the evolution of these policies. In the past thirty years, Perreau explains, political and intellectual life in France have been dominated by debates over how to preserve “Frenchness,” and these debates have

driven policy making. Adoption policies, he argues, link adoption to citizenship, reflecting and enforcing the postcolonial state's notions of parenthood, gender, and Frenchness. After reviewing the complex history of adoption, Perreau examines French political debates over adoption, noting, among other things, that intercountry adoptions stirred far less controversy

than the difference between the sexes in an adopting couple. He also discusses judicial action on adoption; child welfare agencies as gatekeepers to parenthood (as defined by experts); the approval process from the viewpoints of social workers and applicants; and adoption's link to citizenship, and its use as a metaphor for belonging. Adopting a Foucaultian perspective, Perreau calls the biopolitics

of adoption "pastoral": it manages the individual for the good of the collective "flock"; it considers itself outside politics; and it considers not so much the real behavior of individuals as an allegorical representation of them. His argument sheds new light on American debates on bioethics, identity, and citizenship. Corporate Governance Board Practices Incentives and Governing

Metropolitan Museum of Art Who's Who in the Arab World 2007-2008 compiles information on the most notable individuals in the Arab world. Additionally, the title provides insight into the historical background and the present of this influential and often volatile region. Part I sets out precise biographical details on some 6,000 eminent individuals

who influence every sphere of public life in politics, culture and society. Part II surveys the 19 Arab Countries, providing detailed information on the geography, history, constitution, economy and culture of the individual countries. Part III provides information on the historical background of the Arab world. Indexes by country and profession supplement the biographical section. A

select bibliography of secondary literature on the Middle East is also included.

Based on sources in Genesis and Plato's Symposium , the androgyne during Early Modern France was a means of expressing the full potential of humans made in the image of God. This book documents and comments on

the range of references to the androgyne in the writings of poets, philosophers, courtiers, and women in positions of political power.

This book explores the fine line between fiction and history and considers how France's cultural production has contributed to shaping the image of the French Resistance. Though an examination of the lenses through which France has regarded its recent past, the book offers a key to understanding France's national psyche.

Routledge Revivals: Encyclopedia of American Civil Liberties (2006) Jrp Ringier Kunstverlag Ag Editors' Foreword The fundamental changes currently taking place in the national and international science landscapes can no longer be overlooked. Within those changes, reforms do not go 'as planned' but, as is always the case with processes of rationali- tion,

have a series of unintended effects. At the same time it becomes increasingly clear who in this process are the winners and who are the losers, although this is still subject to fluctuation and change. This can be illustrated by two - amples from current events: Where the range of taught courses is concerned, as part of the Bologna Process the new structuring of student study paths and

their organisation is aimed at unifying the European area of science to ensure a study that is equally permissive and efficient. However, it is to be deplored that the mobility of students has become more restricted because of an increasing specialisation in the available study paths. Also, bachelor degrees do not meet with the anticipated high response from the labour market

in all countries, so that the master's degree is becoming more or less a 'must', while at the same time the number of study places on master's courses is limited. Instead of the intended reduction in the duration of study time in comparison to the previous German 'Magister' and 'Diplom', rather a prolongation in the duration of studies has been recorded.

 "Throughout his long career, Henri Matisse (1869-1954) continually expanded the boundaries of his art. By repeating images in pairs, trios, and series, he conducted an ongoing dialogue with his earlier works in order to, as he put it, "push further and

deeper into true painting." In this fresh approach to a much-studied artist, prominent scholars from the United States and Europe examine more than sixty works in concise chapters that focus on this aspect of Matisse's working process. From early pairs such as *Young Sailor I* and *II* (1906) and *Le Lexe I* and *II* (1907-8) through a series of late studio scenes from *Vence* (1946-48),

Matisse is shown revisiting a given theme with the aim of devising innovative, often radical, solutions to such problems as how to portray light, handle paint, select colors, and manipulate perspective. New technical studies of the early paired works and photographs documenting the evolution of his later paintings help to elucidate Matisse's complex evolution. In numerous excerpts from

letters and interviews, he is revealed as an artist who regularly questioned himself and his methods, a man of powerful intellect who regarded each new painting as an adventure. A significant addition to art historical literature, *Matisse: In Search of True Painting* is a revelatory study of a seminal figure in 20th-century modernism."-- Page 4 of cover. *Handbook of Research on*

 The Black Sea remains one of the largest underexplored rift basins in the world. Future success is dependent on a better understanding of a number of geological uncertainties. These include reservoir and source rock presence and quality, and the timing of migration of hydrocarbons relative to trap formation. An appreciation of the geological

history of the Black Sea basins and the surrounding orogens is therefore key. The timing of basin formation, uplift of the margins, and of facies distribution remain issues for robust debate. This Special Publication presents the results of 15 studies that relate to the tectono-stratigraphy and petroleum geology of the Black Sea. The methodologies of these studies encompass crustal

structure, geodynamic evolution, stratigraphy and its regional correlation, petroleum systems, source to sink, hydrocarbon habitat and play concepts, and reviews of past exploration. They provide insight into the many ongoing controversies concerning Black Sea regional geology and provide a better understanding of the geological risks that must be

considered for future hydrocarbon exploration. The New Arab Journalist OECD Publishing Winner of an Outstanding Academic Title Award from CHOICE Magazine Encyclopedia of Environmental Management gives a comprehensive overview of environmental problems, their sources, their assessment, and their solutions. Through in-depth entries and a topical table of

contents, readers will quickly find answers to questions about specific pollution and management issues. Edited by the esteemed Sven Erik Jørgensen and an advisory board of renowned specialists, this four-volume set shares insights from more than 500 contributors—all experts in their fields. The encyclopedia provides basic knowledge for an integrated and ecologically

sound management system. Nearly 400 alphabetical entries cover everything from air, soil, and water pollution to agriculture, energy, global pollution, toxic substances, and general pollution problems. Using a topical table of contents, readers can also search for entries according to the type of problem and the methodology. This allows readers to see the overall picture at a

glance and find answers to the core questions: What is the pollution problem, and what are its sources? What is the "big picture," or what background knowledge do we need? How can we diagnose the problem, both qualitatively and quantitatively, using monitoring and ecological models, indicators, and services? How can we solve the problem with environmental technology,

ecotechnology, cleaner technology, and environmental legislation? How do we address the problem as part of an integrated management strategy? This accessible encyclopedia examines the entire spectrum of tools available for environmental management. An indispensable resource, it guides environmental managers to find the best possible solutions to the myriad

pollution problems they face. The Politics of Adoption

Routledge
The past decade has been characterized by a burgeoning interest in new concepts of individual and social well-being. The impetus for this new

research has stemmed from increased demand from policy makers and civil society for measures of progress that go beyond the traditional measures of GDP, as well as improved datasets allowing individuals and households to be tracked over their life course. The aim of this Handbook is to chart these developments and provide extensive surveys of many of the recent themes that have

emerged in the research literature. Some of the topics addressed include poverty, relative deprivation and satisfaction, economic insecurity, social exclusion and inequality, income and social polarization, and social fractionalization and diversity. Each topic is first analyzed from a theoretical perspective, followed by detailed empirical discussion.

 This study reconstructs for the first time Marguerite of Navarre's leadership of a broad circle of nobles, prelates, humanist authors, and commoners, who sought to advance the reform of the French church along evangelical (Protestant) lines. Hitherto misunderstood in scholarship, they are revealed to have pursued, despite persecution, a consistent reform program from the Meaux experiment to the end of Francis I's reign through a variety of means: fostering local church reform, publishing a large corpus of religious literature, high-profile public preaching, and attempting to shape the direction of royal policy. Their distinctive doctrines, relations with major reformers including their erstwhile colleague Calvin involvement in major Reformation events, and the impact of their unsuccessful attempt are all explored.
