Cambridge English The focus of this volume in our ongoing series has shifted from the technological advances that were the topic of numerous papers in the previous book to more rigorous and empirical research,

especially in the linguistics and methodology section. While the former is represented by the majority of papers, methodology still manages to surprise with new findings in often-overlooked areas, such as how to address students with impairments in English Language Teaching (ELT), the use of gesture, and the development of Massive Open Online Courses

(MOOCs). The linguistics section starts out with a look at academic English as a lingua franca (ELF) practices, native and non-native English varieties and ELT, pragmatic markers and hedging, and corpora. The compact literary section correlates with the diversity inherent in the field and concerns ethnic writing, indigenous storytelling, animality and elaborations on postmodernist fiction. As such, this collection of research papers will bring topics and approaches to the attention of a wide spectrum of practitioners as both an impetus and inspiration.

State Assessment Policy and Practice for English Language Learners

presents three significant studies, each examining a different aspect of states' strategies for including English language learners in state assessments.

\*an Analysis of State Assessment Policies Regarding Accommodations for English Language Learners; \*a Survey and Description of Test Translation Practices; and \*an Examination of State Practices for

Reporting Participation and Performance of English Language Learners in State Assessments. With the rise in population of English language learners and the subsequent stepped-up legislative focus on this student population over the past decade, states have been challenged to include English language learners in state assessment programs.

Until now, the little data available on states' policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the Internet. This volume offers, for the first time, a focused examination of states' assessment policies and practices regarding English language learners. The three studies were supported by

OELA, the U.S. Department of Education's Office of English Language Acquisition, Language Enhancement, and Academic Achievement for Limited English Proficient Students. State Assessment Policy and Practice for English Language Learners is of interest to researchers and professionals involved with the assessment of English language learners;

state- and district-level policy makers; and academics, teacher educators, and graduate students in a number of fields, including educational and psychological assessment, testing and measurement, bilingual education, English as a second language, and second language acquisition.

 This book can be regarded as a resource book for teachers who would like to apply multiple entry point approaches, a framework of multiple intelligences proposed by Gardner, in their language classes. On-line sources are particularly valuable in learning situations where teachers usually expect authentic materials. Moreover, this

book builds a bridge from theory to practical approach aiming to assist teachers who believe intrinsically in the use of technology, but have not been trained in its use. □□□□

 This edited book is about the rationale, practice and classroom implementation of English-medium instruction courses in Chinese universities. It specifically focuses on classroom discourse

analysis across different disciplines and settings. The main themes of this book are:  
 describing the state educational policies toward English-medium instruction at the tertiary level; distinguishing English-medium instruction from mainstream foreign language learning; analyzing curricula and discourse at the classroom level and

evaluating the learning effectiveness of these courses. This book covers the widespread implementation of English-medium courses in China across different disciplines, and it provides a window for researchers and practitioners from other parts of the world to see the curriculum design, lesson planning, discourse features and teacher-student interaction in

English-medium classrooms in China. Contributors to this volume consists of a panel of highly respected researchers in the fields of bilingual education, English-medium instruction, classroom discourse analysis and language program evaluation. Chapters include, Balance of Content and Language in English-Medium Instruction Classrooms English-Medium Instruction in a Math Classroom: An Observation Study of Classroom Discourse Asking and answering questions in EMI classrooms: What is the Cognitive and Syntactic Complexity Level?
