**Pediatric Tracheostomy Home Care Guide** Elsevier Health Sciences

First Edition Designated a Doody's Core Title and Winner of an AJN Book of the Year Award! This distinguished title, written by nationally recognized nursing experts in health care and pediatrics, delivers the most current evidence-based practice standards and their application. These guidelines, developed through systematic consensus-building led by the AAN's Child, Adolescent, and Family Expert Panel, incorporates the wisdom of 17 professional nursing and healthcare organizations regarding the core elements of pediatric nursing excellence. This second edition contains substantial updates to all guidelines based on the most current research evidence and demonstrates examples of how to best apply the guidelines to nursing practice.

Disseminating the gold standard of care for infants, children, adolescents, and families, this text addresses access to health care, genetic assessment and counseling, culturally responsive care, care for children and youth with disabilities, and others. Every chapter breaks down a guideline into its definition, history, and implications for clinical, education, policy, and research in nursing practice. A case study based around the analyzed guideline illustrates how the guideline should be employed in nursing practice culminates every chapter. Replete with supplemental online files full of resources to apply these guidelines to nursing practice, *Guidelines for Nursing Excellence in the Care of Children, Youth, and Families* represents an invaluable resource for pediatric nurses, nursing students, nursing educators, nursing administrators, pediatric and family nurse practitioners, advanced practice nurses, nursing clinicians in public health, school nurses, and nurse researchers. New to the Second Edition: Significant updates to all 17 guidelines based on latest research evidence Contributions by five new nursing and health care organizations A new chapter organizational framework incorporating useful pedagogical elements Examples of applications to education, research, policy, and clinical practice A new faculty toolkit Key Features: Provides current pediatric practice standards formatted and endorsed by 17 leading professional nursing and health care organizations Includes content applicable to advanced practice nurses, educators, researchers, and consultants Includes learning objectives, description of guidelines, applications to practice, exemplars, references, and websites for additional resources

**Home Care for the High-risk Infant** JHU Press

Professional reference for Nurses on Home Health Care  
**Pediatric Airway Management for the Prehospital Professional** Jones & Bartlett Learning

The first book to comprehensively address private equity and health care, *Ethically Challenged* raises the curtain on an industry notorious for its secrecy, exposing the nefarious side of its maneuvers.

**Pediatric Home Care for Nurses** F. A. Davis Company

*Pediatric Home Care* is a practice-based text perfect for either students or for supporting pediatric nurses practicing in a home-care setting. The text includes a variety of nursing information required for this type of care across a large spectrum of physiologic categories and acuity levels. The Third Edition has been completely revised and updated to reflect the most current practice and technology and includes a new focus on evidence based practice.

**The Handbook of Child Life** Springer Nature

This book is a step-by-step illustrated guide for parents and others who care for children with tracheostomies. Essential topics include: what is a tracheostomy ; types of tracheostomy tubes ; reasons for tracheostomies ; eating with tracheostomies ; home equipment ; parenting challenges. --from back cover.

**Pediatric Nursing** Jones & Bartlett Publishers

Now in its Second Edition, this text focuses exclusively on the management of hospitalized pediatric patients from admission to discharge. It is an excellent resource for residency programs, hospitalist fellowships, and continuing education for physicians whose practice includes the management of hospitalized newborns and children. Because pediatric hospital care is provided by a wide variety of healthcare professionals and in many different hospital settings, this text provides a framework for unified management and effective and efficient care. This edition includes new sections on emergency medicine and psychiatric hospitalization and expanded coverage of management of children with complex and chronic conditions.

**Pediatric Home Care** Springer Science & Business Media

Home health care is an important aspect of community health and a growing area of healthcare services. *Clinical Case Studies in Home Health Care* uses a case-based approach to provide home healthcare professionals, educators, and students with a useful tool for thoughtful, holistic care. The book begins with a thorough and accessible introduction to the principles of home health care, including a discussion of supporting theoretical frameworks and information on managing complexities, transitioning patients to home care, and preparation for the home visit. Subsequent sections are comprised entirely of case studies organized by body system. Though cases are diverse in content, each is presented in a consistent manner, incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation. Cases also include helpful tips about reimbursement practices, cultural competence, community resources, and rehabilitation needs.

**Pediatric Nursing** Elsevier Health Sciences

Intended for both financial and nonfinancial managers, this text covers six primary areas the author deems necessary for managers to incorporate into their decision-making processes: financial reporting, prospective and retrospective payment systems, cost accounting, management accounting, financial management, and strategic management. The author, a business and finance consultant, stresses the importance of teamwork in working toward an outcome management system that honors clients and coworkers, promotes innovation, and balances clinical and financial organizational requirements. **Technology-dependent children : hospital v. home care.** Springer Publishing Company

**P: Pediatric Nursing Care: A Concept-Based Approach** teaches undergraduate nursing students the need to know information for working in a pediatric nursing environment.

**Home Health Care for Chronically Ill Children** Department of Health and Human Services

This revised, expanded edition addresses the increased interest in and demand for information about the nursing care of premature, technology-dependent infants once they are at home. In addition to clinical practice and research updates it includes care plans,

assessment forms, sample care maps, and other hands-on materials which make it a valuable tool as well as a textbook.  
**Pediatric Palliative Care: Global Perspectives** Springer Publishing Company

A reference for home health and rehabilitation therapists, or text for graduate students of occupational and physical therapy, this volume is divided into four sections: an overview of home health care; specific therapeutic interventions; cultural, cognitive, motivational, and professional issues; and independent topics (including pediatric home care and care of the terminally ill).

Annotation copyright by Book News, Inc., Portland, OR  
**Handbook of Home Health Care Administration** Jones & Bartlett Learning

Stay up-to-date on the latest evidence and clinical practice in pediatric acute care with the definitive textbook in the field. Now in its second edition, *Pediatric Acute Care: A Guide for Interprofessional Practice* takes an evidence-based, interprofessional approach to pediatric acute care as it exemplifies the depth and diversity that's needed for the dynamic healthcare environments in which acutely ill children receive care. Coverage includes how to work with the pediatric patient and family, major acute care disorders and their management, emergency preparedness, common acute care procedures, and much more. With contributions from more than 200 practicing clinicians and academic experts, it represents a wide variety of disciplines including medicine, nursing, pharmacy, child life, nutrition, law, integrative medicine, education, public health, and psychology, among others. The second edition also features the addition of new physician and nurse practitioner co-editors as well as extensive content updates including updated evidence-based content throughout the text, the integration of the 2016 IPEC Core Competencies for Interprofessional Collaborative Practice, a new full-color design, and new vivid illustrations throughout. UNIQUE! Interprofessional collaborative approach includes contributions from more than 200 practicing clinicians and academic experts from the U.S. and Canada, including nursing, medicine, pharmacy, child life, nutrition, law, integrative medicine, education, public health, and psychology. Consistent organization within disorder chapters begins with a section on Physiology and continues with sections on Pathophysiology, Epidemiology and Etiology, Presentation, Differential Diagnosis, Diagnostic Studies, and a Plan of Care that include Therapeutic Management, Consultation, Patient and Family Education and Disposition and Discharge Planning. Comprehensive content spanning five units divides coverage into introductory information, the approach to the pediatric patient and family, major acute care disorders and their management, emergency preparedness, and common acute care procedures. NEW! Updated evidence-based content has been added throughout to ensure that you're up-to-date on all topics needed to provide care for pediatric patients in acute, inpatient, emergency, transport, and critical care settings. NEW! Full-color design and illustrations enhance learning and make content easier to navigate and digest. NEW! Integration of the 2016 IPEC Core Competencies ensure that you're learning the professional skills and protocols required for effective, contemporary interprofessional collaborative practice. UPDATED! Streamlined procedures unit focuses more sharply on need-to-know content.

**Consulting with Pediatricians** Delmar Pub

Examining caregiving issues from a multigenerational, family life cycle perspective, this volume deals with the broad spectrum of chronic illnesses that necessitate family caregiving throughout the lifespan and discusses responses to these challenges by both caregiving families and caregiving systems. Part One addresses the caregiving paradigm and the relationship of family caregiving research to family life studies. Part Two examines conceptual aspects of caregiving, ranging from the expansion of the caregiving paradigm, caregiving processes and tasks, to the positive aspects of caregiving. Part Three emphasizes how family caregivers are affected by the connection (or lack of it) to macro-level systems.

**Guidelines for Nursing Excellence in the Care of Children, Youth, and Families, Second Edition** DIANE Publishing

Caring for ill children is always challenging, but technological advances, reforms in health care and cost control efforts have made caring for these children increasingly complex. More and more, care occurs in ambulatory, outpatient and home settings, often with the family playing a large role. *Pediatric Nursing: Caring for Children and Their Families* approaches the topic of children's healthcare from a family-centered and holistic perspective, viewing children not just as patients, but as evolving human beings. Focus is placed on anticipatory guidance nursing professionals can give to families related to developmental milestones, health concerns and health promotion strategies

specific to each stage of development. Traditional areas of assessment, disease processes and health promotion are examined within the context of contemporary social and cultural influences. Caring for Children and Their Families facilitates the development of sensitivity and critical thinking skills today's undergraduate nursing student and tomorrow's nurse will need to meet the challenges of pediatric healthcare.

**Orientation to Home Care Nursing** Elsevier Health Sciences  
The first of its kind, this book describes pediatric palliative care in more than 23 countries. Each region in the world is covered and countries included are both resource poor and rich. Authors are multidisciplinary and regarded nationally and internationally in their field. Clinicians, advocates, policymakers, funders, and researchers will learn how programs were developed and implemented in each country. Authors describe children for whom pediatric palliative care is needed and provided for in their country. When applicable, a brief history of pediatric palliative care is included noting especially policy changes and legislative acts. For example, the chapter on Poland describes how pediatric palliative care grew from the Catholic church into a national movement spearheaded by several health care workers. The Pole national spirit that brought them through a change in political regime has also been a driving force in the pediatric palliative care movement. The chapter on South Africa, for example, illustrates how a resource poor country has been able to leverage philanthropic and government funding to make its dream of having an infrastructure of pediatric palliative care a reality. These are just a few examples of the inspiring stories that are included in this book. Readers from countries who wish to start a pediatric palliative care program, or advance an existing program, will learn valuable lessons from others who have faced similar barriers. Introduction and concluding chapters highlight the strengths and weaknesses of the modern pediatric palliative care movement.

**Technology-dependent Children** Jones & Bartlett Learning  
Twenty-nine practitioners combine their expertise to bring clarity to an issue that is at the forefront of discussion-home health care. The field is emerging and is growing faster than most professionals and their patients can keep up with. Here is a text in which the authors make every effort to provide readers with the latest thinking and technology that can better the home health care field. Spiralling costs have forced all aspects of illnesses to be closely scrutinized for possible home care applications and financial savings. The industry is growing rapidly, fueled by

increasing service and constant technological breakthroughs, but the overriding philosophy must be focused on cost containment with maintenance of high quality care. This book is directed at providing highly practical, up-to-date information that health care professionals can use in their daily practices.

**Patient Safety and Quality** Lulu Press, Inc  
Child life is a profession that draws on the insights of history, sociology, anthropology and psychology to serve children and families in many critical stress points in their lives, but especially when they are ill, injured or disabled and encounter the hosts of caregivers and institutions that collaborate to make them well. Children and their families can become overwhelmed by the task of understanding and navigating the healthcare environment and continue to face challenges through their daily encounters. It is the job of child life professionals to provide care and guidance in these negotiations to serve as culture brokers, interpreters of the healthcare apparatus to family and child and the child to medical professionals. Despite the best efforts to provide quality, sensitive psychosocial care to children and their families, they remain vulnerable to lingering aftereffects. The goal of this revised edition is to help prepare child life specialists to deliver the highest level of care to children and families in the context of these changing realities. Each chapter has been substantially revised and two new chapters have been added. This book will be a valuable resource for not only child life specialists but also nurses, occupational and recreational therapists, social workers and other hospital personnel.

**Certified Nurse Educator (CNE) Review Manual** John Wiley & Sons

This book reflects the cumulative work of two previous iterations and includes their complete text. It is a foundational volume that articulates the essentials of this specialty, its accountabilities and activities - the who, what, when, where, and how of its practice - for both specialists and generalists. The 16 standards themselves - those by which all nurses in this specialty practice and their practice competencies measured and evaluated - are grounded in the perspectives and priorities of pediatric nursing and form the core of the book. The book's extensive scope of practice discussion - of its characteristics, development and trends, education and training, its practice environments and settings, its general and specialized practice roles, its ethical and conceptual bases - lends a broad context for understanding and using these standards. Although this reference and guide is mainly for practicing nurses and nursing faculty and students, Pediatric

Nursing: Scope and Standards of Practice is also an essential source document for other pediatric specialists, healthcare providers, researchers, and scholars.

**Medical and Health Information Directory** Jones & Bartlett Learning

The most trusted authority in pediatric nursing, Wong's Nursing Care of Infants and Children provides unmatched, comprehensive coverage of pediatric growth, development, and conditions. Its unique 'age and stage' approach covers child development and health promotion as well as specific health problems organized by age groups and body systems. Leading pediatric experts Dr. Marilyn Hockenberry and David Wilson provide an evidence-based, clinical perspective based on nearly 30 years of hands-on experience. Easy to read and extensively illustrated, this edition focuses on patient-centered outcomes and includes updates on topics such as the late preterm infant, immunizations, the H1N1 virus, and childhood obesity. A clear, straightforward writing style makes content easy to understand. Unique Evidence-Based Practice boxes help you apply both research and critical thought processes to support and guide the outcomes of nursing care. Unique Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Unique Critical Thinking exercises help you test and develop your own analytical skills. A unique focus on family content emphasizes the role and influence of the family in health and illness with a separate chapter, discussions throughout the text, and family-centered care boxes. Nursing Care Guidelines provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Unique Emergency Treatment boxes serve as a quick reference for critical situations. Unique Cultural Awareness boxes highlight ways in which variations in beliefs and practices affect nursing care for children. A developmental approach identifies each stage of a child's growth. Health promotion chapters emphasize principles of wellness and injury prevention for each age group. Student-friendly features include chapter outlines, learning objectives, key points, references, and related topics and electronic resources to help you study and review important content. A community focus helps you care for children outside the clinical setting. Nursing Care Plans include models for planning patient care, with nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care.
