Alice Notley vividly reconstructs the mysteries, longings, and emotions of her past in this brilliant new collection of poems that charts her growth from young girl to young woman to accomplished artist. In this volume, memories of her childhood in the California desert spring to life through evocative renderings of the American landscape, circa 1950. Likewise, her coming of age as a poet in the turbulent sixties is evoked through the era's angry, creative energy. As she looks backward with the perspective that time and age allows, Notley ably captures the immediacy of youth's passion while offering her own dry-eyed interpretations of the events of a life lived close to the bone. Like the colorful collages she assembles from paper and other found materials, Notley erects structures of image and feeling to house the memories that swirl around her in the present. In their feverish, intelligent renderings of moments both precise and ephemeral, Notley's poems manage to mirror and transcend the times they evoke. Her profound tributes to the stages of her life and to the identities she has assumed—child, youth, lover, poet, wife, mother, friend, and widow—are remarkable for their insight and wisdom, and for the courage of their unblinking gaze.

What are the challenges architects face when designing dwelling spaces of a limited size? And what can these projects tell us about architecture – and architectural principles – in general? In BIG

little house, award-winning architect Donna Kacmar introduces twenty real-life examples of small houses. Each project is under 1,000 square feet (100 square meters) in size and, brought together, the designs reveal an attitude towards materiality, light, enclosure and accommodation which is unique to minimal dwellings. While part of a trend to address growing concerns about minimising consumption and lack of affordable housing, the book demonstrates that small dwellings are not always simply the result of budget constraints but constitute a deliberate design strategy in their own right. Highly illustrated and in full-colour throughout, each example is based on interviews with the original architect and accompanied by detailed floor plans. This groundbreaking, beautifully designed text offers practical guidance to any professional architect or homeowner interested in small scale projects.
