"Dr. Frisby focuses a bright light on issues that often remain obscured in a fog of polemics, deeply held convictions, and genuine concern for the plight of minority students. Meeting the Psychoeducational Needs of Minority Students cuts through this fog with intense, sharp, clear thinking and data-driven conclusions." —Jeffrey P. Braden, PhD, Professor of Psychology and Dean of the College of Humanities and Social

Sciences, North Carolina State University "Going beyond superficial 'feel good' or 'feel bad' ideologiosto probe what really makes a difference in meeting the needs of often underserved populations, Craig Frisby provides a comprehensive, rigorous, well-written, and entertaining (honest!) work that addresses the intersection of race, ethnicity, and education." —Betty Henry, PhD, School Psychologist, California School for the Blind "Dr. Frisby makes a perceptive and incisive assessment of much of the multicultural ideology currently propagated in professional psychology and education and directly confronts some of the major issues surrounding multiculturalism. Unlike many other critiques that have been proffered over the last few decades, however, Meeting the Psychoeducational Needs of Minority Students also provides many concrete solutions for how to begin changing the current milieu." —A. But William's innovative vision did inspire a big idea that would set him apart: he turned numbers into pictures by creating line graphs, bar graphs and pie charts! Numbers as pictures?
