Produced in 1958, *The Big Country* featured an all-star cast that included Gregory Peck, Charlton Heston, and Oscar-winner Burl Ives. One of the most enduring elements of the film has been Jerome Moross's score. In Jerome Moross's *The Big Country: A Film Score Guide*, Mariana Whitmer examines Moross's landmark work, a score that continues to attract listeners and influence composers of film, Westerns and otherwise. This book begins with a biographical survey of Moross's formative years, providing an historical context for understanding his approach to scoring *The Big Country*. Drawing upon Moross's original manuscripts and correspondence, Whitmer looks carefully at the score itself and examines the music's individual cues. Finally, the aftermath of this score is considered, including how it has influenced not only subsequent Westerns but also music videos.

Bruce Greenwald, one of the nation's leading business professors, presents a new and simplified approach to strategy that cuts through much of the fog that has surrounded the subject. Based on his hugely popular course at Columbia Business School, Greenwald and his coauthor, Judd Kahn, offer an easy-to-follow method for understanding the competitive structure of your industry and developing an appropriate strategy for your specific position. Over the last two decades, the conventional approach to strategy has become frustratingly complex. It's easy to get lost in a sophisticated model of your competitors, suppliers, buyers, substitutes, and other players, while losing sight of the big question: Are there barriers to entry that allow you to do things that other firms cannot?

In 1950, after over fifty years of military occupation and colonial rule, the Nationalist Party of Puerto Rico staged an unsuccessful armed insurrection against the United States. Violence swept through the island: assassins were sent to kill President Harry Truman, gunfights roared in eight towns, police stations and post offices were burned down. In order to suppress this uprising, the US Army deployed thousands of troops and bombarded two towns, marking the first time in history

that the US government bombed its own citizens. Nelson A. Denis tells this powerful story through the controversial life of Pedro Albizu Campos, who served as the president of the Nationalist Party. A lawyer, chemical engineer, and the first Puerto Rican to graduate from Harvard Law School, Albizu Campos was imprisoned for twenty-five years and died under mysterious circumstances. By tracing his life and death, Denis shows how the journey of Albizu Campos is part of a larger story of Puerto Rico and US colonialism. Through oral histories, personal interviews, eyewitness accounts, congressional testimony, and recently declassified FBI files, *War Against All Puerto Ricans* tells the story of a forgotten revolution and its context in Puerto Rico's history, from the US invasion in 1898 to the modern-day struggle for self-determination. Denis provides an unflinching account of the gunfights, prison riots, political intrigue, FBI and CIA covert activity, and mass hysteria that accompanied this tumultuous period in Puerto Rican history.

In Defense of Looting Basic Books

A page-turning account of the international cocaine trade, presented as five lessons in how to move tons of the drug across borders Forget about cocaine concealed in false-bottomed suitcases or swallowed in ovules resistant to gastric juices. When entire national economies are kept afloat by the money from cocaine smuggling, the quantities these tactics represent are meaningless. When a commodity like cocaine becomes a mainstay of the international economy, grams and kilos are irrelevant. Because what is needed to sustain the market is cocaine by the ton. Tons of cocaine means ships, cargo planes, and containers: large, cumbersome, extremely tangible, and visible amounts of white powder. So how is all that merchandise moved through harbors and airports? How are customs offices deceived, fiscal checks eluded, police networks infiltrated, and documents prepared to disguise mountains of cocaine? It's done with coca made into cubes, dissolved in liquid, hidden in marble blocks or inside electric cables. With friends in the right places. With cocaine smuggled in cranes. With sniffer dogs supplied to the police, free of charge. With money in cash, always. And yes, with willing mules swallowing drugs. But they will be arrested, and that's part of the plan. Drawing from years of research and conversations with criminal sources and convicted drug smugglers, with new information on the techniques, methods, and strategies used, Luca Rastello brings us a devastating portrait of the international cocaine trade. Told from the perspective of the formidable entrepreneurs whose tactics evolve and adapt to keep pace with shifts in the global economy, *I Am the Market* is a masterful exposé of a world we thought we understood—until now.

This is a study of the Second Battle of Fallujah, also known as Operation Al-Fajr and Operation Phantom Fury. Over the course of November and December 2004, the I Marine Expeditionary Force conducted a grueling campaign to clear the city of Fallujah of insurgents and end its use as a base for the anticoalition insurgency in western Iraq. The battle involved units from the Marine Corps, Army, and Iraqi military and constituted one of the largest engagements of the Iraq War. The study is based on interviews conducted by Marine Corps History Division field historians of battle participants and archival material. The book will be of primary interest to Marines, other service members, policy makers, and the faculty and students at the service schools and academies. Historians, veterans, high school through univeristy history departments and students as well as libraries may be interested in this book as well. With full color maps and photographs.

This book is about making machine learning models and their decisions interpretable. After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression. Later chapters focus on general model-agnostic methods for interpreting black box models like feature importance and accumulated local effects and explaining individual predictions with Shapley values and LIME. All interpretation methods are explained in depth and discussed critically. How do they work under the hood? What are their strengths and weaknesses? How can their outputs be interpreted? This book will enable you to select and correctly apply the interpretation method that is most suitable for your machine learning project.

Reducing Gun Violence in America Macmillan

This open access book aims to set an agenda for research and action in the field of Digital Humanism through short essays written by selected thinkers from a variety of disciplines, including computer science, philosophy, education, law, economics, history, anthropology, political science, and sociology. This initiative emerged from the Vienna Manifesto on Digital Humanism and the associated lecture series. Digital Humanism deals with the complex relationships between people

and machines in digital times. It acknowledges the potential of information technology. At the same time, it points to societal threats such as privacy violations and ethical concerns around artificial intelligence, automation and loss of jobs, ongoing monopolization on the Web, and sovereignty. Digital Humanism aims to address these topics with a sense of urgency but with a constructive mindset. The book argues for a Digital Humanism that analyses and, most importantly, influences the complex interplay of technology and humankind toward a better society and life while fully respecting universal human rights. It is a call to shaping technologies in accordance with human values and needs.

"Elmore Leonard can write circles around almost anybody active in the crime novel today." —New York Times Book Review The revered New York Times bestselling author, recognized as "America's greatest crime writer" (Newsweek), brings back U.S. Marshal Raylan Givens, the mesmerizing hero of Pronto, Riding the Rap, and the hit FX series Justified. With the closing of the Harlan County, Kentucky, coal mines, marijuana has become the biggest cash crop in the state. A hundred pounds of it can gross \$300,000, but that's chump change compared to the quarter million a human body can get you—especially when it's sold off piece by piece. So when Dickie and Coover Crowe, dope-dealing brothers known for sampling their own supply, decide to branch out into the body business, it's up to U.S. Marshal Raylan Givens to stop them. But Raylan isn't your average marshal; he's the laconic, Stetson-wearing, fast-drawing lawman who juggles dozens of cases at a time and always shoots to kill. But by the time Raylan finds out who's making the cuts, he's lying naked in a bathtub, with Layla, the cool transplant nurse, about to go for his kidneys. The bad guys are mostly gals this time around: Layla, the nurse who collects kidneys and sells them for ten grand a piece; Carol Conlan, a hard-charging coal-mine executive not above ordering a cohort to shoot point-blank a man who's standing in her way; and Jackie Nevada, a beautiful sometime

college student who can outplay anyone at the poker table and who suddenly finds herself being tracked by a handsome U.S. marshal. Dark and droll, Raylan is pure Elmore Leonard—a page-turner filled with the sparkling dialogue and sly suspense that are the hallmarks of this modern master.

A searing portrait of the racial dynamics that lie inescapably at the heart of our nation, told through the turbulent history of the city of St. Louis. From Lewis and Clark's 1804 expedition to the 2014 uprising in Ferguson, American history has been made in St. Louis. And as Walter Johnson shows in this searing book, the city exemplifies how imperialism, racism, and capitalism have persistently entwined to corrupt the nation's past. St. Louis was a staging post for Indian removal and imperial expansion, and its wealth grew on the backs of its poor black residents, from slavery through redlining and urban renewal. But it was once also America's most radical city, home to anti-capitalist immigrants, the Civil War's first general emancipation, and the nation's first general strike—a legacy of resistance that endures. A blistering history of a city's rise and decline, *The Broken Heart of America* will forever change how we think about the United States.

A hard-hitting exposé of SEAL Team 6, the US military's best-known brand, that reveals how the Navy SEALs were formed, then sacrificed, in service of American empire. The Navy SEALs are, in the eyes of many Americans, the ultimate heroes. When they killed Osama Bin Laden in 2011, it was celebrated as a massive victory. Former SEALs rake in cash as leadership consultants for corporations, and young military-bound men dream of serving in their ranks. But the SEALs have lost their bearings. Investigative journalist Matthew Cole tells the story of the most lauded unit, SEAL Team 6, revealing a troubling pattern of war crimes and the deep moral rot beneath authorized narratives. From their origins in World War II, the SEALs have trained to be specialized killers with short missions. As the wars in Iraq and Afghanistan became the endless War on Terror, their violence spiraled out of control. *Code Over Country* details the high-level decisions that unleashed the SEALs' carnage and the coverups that prevented their crimes from coming to light. It is a necessary and rigorous investigation of the unchecked power of the military—and the harms enacted by and upon soldiers in America's name.

[Handgun Combatives - 2nd Edition](#) Oxford University Press

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.
