*Holstein-Friesian Herd-  
book* University of Texas  
Press

The present English version, authorized by the publishers and heirs of M. Merimee, is based on the third French Edition. New material of two sorts has been added, however. First, the translator has been allowed to utilize an annotated, interleaved copy of the *Precis*, 1922, in which the author, and after his death his son Henri, himself a distinguished Hispanist, had set down material for the next revision. This accounts for many inserted names and phrases, and some paragraphs. Second, the

translator has rewritten and added with some freedom.

**Medicus** SIU Press  
Written with all the scathing dark humor that is a hallmark of BoJack Horseman, Raphael Bob-Waksberg delivers a fabulously off-beat collection of short stories about love—the best and worst thing in the universe. Featuring: • A young engaged couple forced to deal with interfering relatives dictating the appropriate number of ritual goat sacrifices for their wedding. • A pair of lonely commuters who ride the subway in silence, forever, eternally failing to make that longed-for contact. • A struggling employee at a theme park of U.S. presidents who

discovers that love can't be genetically modified. And fifteen more tales of humor, romance, whimsy, cultural commentary, and crushing emotional vulnerability. King Richard II BoD - Books on Demand  
The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self. Congressional Record Elsevier  
Reprint of the original, first published in 1868. *The American Shorthorn Herd Book* Oxford University Press

A land of incredible natural resources, the South American continent is rich in plant and animal species. Among birds alone, over 3,100 species are either resident or migrant. Birds are some of South America's treasures and also one of its most endangered resources. Hence the need for a descriptive record of South American birds that will serve both professional and amateur bird students and encourage conservation of these magnificent species. Although South American birds elicit much popular and scientific interest, they have never been completely or satisfactorily described and cataloged in a single, published source. The *Birds of South America*, projected to be a four-volume work, thus fills a critical void. Starting from a museum approach, the authors have examined specimens of each subspecies, comparing them visually and trying to discern the patterns in their plumage variation, both intra- and inter-specifically. They take a new look at bird systematics, reassessing relationships in light of new information. Perhaps most important, they

combine this review and analysis with extensive field observations to give an accurate, incisive portrait of the birds in nature. At a time when rapid development is devastating millions of acres of tropical habitat in South America, this record of an endangered resource becomes crucial. If the birds and other plants and animals of South America are to be saved, they must first be known and appreciated. The *Birds of South America* is a major step in that direction. Volume II includes the Ovenbirds and Woodcreepers, Antbirds, Gnatcatchers, and Tapaculos; Tyrant Flycatchers; and Manakins and Cotingas. The remaining volumes of *The Birds of South America* will be: Volume III: The Nonpasserines (Landbirds) Volume IV: The Nonpasserines (Waterbirds) No release date has been set for the remaining volumes.

*Fashioning the Future in Roman Greece: Memory, Monuments, Texts* uses literature, inscriptions, art, and architecture to explore the relationship of elite Greeks of the Roman imperial period to time.

This wide-ranging work challenges conventional thinking about the temporal positioning of imperial Greece and the so-called 'Second Sophistic', which holds that it was obsessed above all with the Classical past. Instead, the volume establishes that imperial Greek temporality was far more complex than scholarship has previously allowed by detailing how contemporary cultural output used the past to position itself within tradition but was crafted to speak to the future. At the same time, the book emphasizes the value of interdisciplinary analysis in any explication of elite culture in Roman Greece, since abundant extant evidence reveals its purveyors were often responsible for the production of both literature and material culture. Strazdins shows how these two modes of cultural production in the hands of elites, such as Herodes Atticus, Arrian, Aelius Aristides, Lucian, Dio Chrysostom, Polemon, Pausanias, and Philostratus, exhibit a shared rhetoric oriented towards posterity and informed by a heightened awareness of the fragility of cultural and personal

memory over large spans of time. The book thus provides a sophisticated analysis of the tensions, anxieties, and opportunities that attend the fashioning of commemorative strategies against the background of the 'Second Sophistic' and the Roman empire, and details the consequences of embroilment with futurity on our understanding of the cultural and political concerns of elite imperial Greeks.

*American Hereford Record and Hereford Herd Book*  
Routledge

This provocative study proves the existence of a de facto Confederate policy of giving no quarter to captured black combatants during the Civil War—killing them instead of treating them as prisoners of war. Rather than looking at the massacres as a series of discrete and random events, this work examines each as part of a ruthless but standard practice. Author George S. Burkhardt details a fascinating case that the Confederates followed a consistent pattern of murder against the black soldiers who served in Northern armies after Lincoln's 1863

Emancipation Proclamation. He shows subsequent retaliation by black soldiers and further escalation by the Confederates, including the execution of some captured white Federal soldiers, those proscribed as cavalry raiders, foragers, or house-burners, and even some captured in traditional battles. Further disproving the notion of Confederates as victims who were merely trying to defend their homes, Burkhardt explores the motivations behind the soldiers' actions and shows the Confederates' rage at the sight of former slaves—still considered property, not men—fighting them as equals on the battlefield. Burkhardt's narrative approach recovers important dimensions of the war that until now have not been fully explored by historians, effectively describing the systemic pattern that pushed the conflict toward a black flag, take-no-prisoners struggle. *Pocket Dictionary of the English-Dutch and Dutch-English Languages*

*Fruit Crops: Diagnosis and Management of Nutrient Constraints* is the first and only resource to holistically relate fruits as a nutritional source for human health to the state-of-the-art methodologies currently used to diagnose and manage nutritional constraints placed on those fruits. This book explores a variety of advanced management techniques, including open field hydroponic, fertigation/bio-fertigation, the use of nano-fertilizers, sensors-based nutrient management, climate-smart integrated soil fertility management, inoculation with microbial consortium, and endophytes backed up by ecophysiology of fruit crops. These intricate issues are effectively presented, including real-world applications and future insights. Presents the latest research, including issues with

commercial application  
 Details comprehensive  
 insights into the diagnosis  
 and management of
