Eastern and Southern Africa countries and Europe plus other contributions from Canada and United States of America. Unfortunately, our colleagues from Asia could not participate in this project for several reasons but we hereby acknowledge their contribution to the scientific level reached by the international scientific community. Apart from the classic issue that cannot be	missing in any book about cysticercosis/ neurocysticercosis, we introduced a new hypotheses and novel aspects on historical background, clinical descriptions, investigations, and treatment modalities related to this zoonotic parasitic disease as a leading cause of epilepsy in developing countries. We are looking forward with confidence and pride in the vital role that this book will play for a	new vision and mission. <i>Social Computing Theory and Practice: Interdisciplinary Approaches</i> Academic Conferences and publishing limited In South African higher education, the images of dysfunction are everywhere. Student protests. Violence. Police presence. Rubber or real bullets. Class disruptions. Burning tyres. Damaged buildings. Injury and sometimes
---	--	---

death. Reports of wholesale corruption. Year after year, often in the same set of universities; the problem of routine instability seems insoluble. The financial, academic and reputational costs of ongoing dysfunction are high, especially for those universities caught-up in the never-ending struggle to overcome apartheid legacies. Any number of explanations have been

ventured, including a lack of resources, shortage of capacity, rural location, corrupt officials, and endemic conflict. Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities. At the heart of the problem lies the vexed issue of resources or, more pertinently, the relationship between resources and

power: who gets what, and why? Whatever else it aspires to be—commonly, a place of teaching, learning, research and public duty—a university in an impoverished community is also a rich concentration of resources around which corrupt staff, students and those outside of campus all vie for access. Taking a political economic approach, Jonathan Jansen describes the daily struggle

for institutional resources and offers accessible, sensible insights. He argues that the problem won't be solved through investments in 'capacity building' alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities. Rather, durable solutions would include the depoliticisation of university

councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions. This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly. *Political Science in South Africa* NYU Press Globalization, the information age, and the rise of the

knowledge-based economy are significantly transforming the way we acquire, disseminate, and transform knowledge. And, as a result, knowledge production is becoming closer and more directly linked to economic competitiveness. This evolution is also putting new and urgent demands on academic institutions to adjust to the changing needs of society and

economy. In particular, there is growing pressure on the institutions of higher education and research in developed economies to find and affirm their new role in the national innovation system. Their counterparts in developing economies need to define their role in supporting emerging structures of the innovation system. This book examines the role of universities and national

research institutes in social and economic development processes. Featuring contributions that showcase initiatives and innovations from around the world, including China, Eastern Europe, Latin America, Scandinavia, Southeast Asia, sub-Saharan Africa, and Western Europe, it offers timely insight that will be of interest to policymakers, university administrators, economic

and social leaders, and researchers alike. [Handbook of Research on Discourse Behavior and Digital Communication: Language Structures and Social Interaction](#) Springer This book provides an analysis of South African urban change over the past three decades. It draws on a seminal text, *Homes Apart*, and revisits conclusions drawn in that collection that marked the final phases of

urban apartheid. It highlights changes in demography, social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa. The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement so the conclusions of the various

investigations are in many ways open. As urban apartheid represented one clear outcome, its post-apartheid urban legacies varies greatly from city to city. As such this book is a great resource to students and academics focused on urban change in South African cities since the demise of apartheid, and scholars of urban policy-making in South Africa and Southern urbanists generally.

[ICEL2015-10th International Conference on e-Learning](#)
Springer Science & Business Media
Advancements in data science have created opportunities to sort, manage, and analyze large amounts of data more effectively and efficiently. Applying these new technologies to the healthcare industry, which has vast quantities of patient and medical data and is increasingly

becoming more data-reliant, is crucial for refining medical practices and patient care. Data Analytics in Medicine: Concepts, Methodologies, Tools, and Applications is a vital reference source that examines practical applications of healthcare analytics for improved patient care, resource allocation, and medical performance, as well as for diagnosing, predicting, and

identifying at-risk populations. Highlighting a range of topics such as data security and privacy, health informatics, and predictive analytics, this multi-volume book is ideally designed for doctors, hospital administrators, nurses, medical professionals, IT specialists, computer engineers, information technologists, biomedical engineers, data-processing specialists, and healthcare

practitioners, academicians, and researchers interested in current research on the connections between data analytics in the field of medicine. [Advances in Manufacturing Engineering](#) Routledge The 8th International Conference on Sustainable Development and Planning is part of a series of biennial conferences on the topic of sustainable regional development which began

in Greece in 2003. The papers included in these proceedings report on the latest advances from scientists specialising in the range of subjects included within sustainable development and planning. Planners, environmentalists, architects, engineers, policy makers and economists have to work together in order to ensure that planning and development

can meet our present needs without compromising the ability of future generations. The use of modern technologies in planning gives us new potential to monitor and prevent environmental degradation. Problems related to development and planning, which affect both rural and urban areas, are present in all regions of the world and accelerated urbanisation has resulted in both the deterioration

of the environment and quality of life. Urban development can also intensify problems faced by rural areas such as forests, mountain regions and coastal areas, which urgently require solutions in order to avoid irreversible damage. The papers in the book cover the following topics: City planning; Regional planning; Rural developments ; Sustainability and the built environment;

These proceedings represent the work of researchers participating in the 10th International Conference on e-Learning (ICEL 2015) which is being hosted this year by the

College of the Bahamas, Nassau on the 25-26 June 2015. ICEL is a recognised event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in the area of e-Learning. It provides an important opportunity for researchers and managers

to come together with peers to share their experiences of using the varied and expanding range of e-Learning available to them. With an initial submission of 91 abstracts, after the double blind, peer review process there are 41 academic Research papers and 2 PhD papers Research papers published in these Conference Proceedings. These papers come from

some many different countries including: Australia, Belgium, Brazil, Canada, China, Germany, Greece, Hong Kong, Malaysia, Portugal, Republic of Macedonia, Romania, Slovakia, South Africa, Sweden, United Arab Emirates, UK and the USA. A selection of the best papers – those agreed by a panel of reviewers and the editor will be published in a

In a world
where new
technologies
are being
developed at
a dizzying
pace, how can
we best
approach oral
genres that
represent
heritage?
Taking an
innovative and
interdisciplinar
y approach,
this volume
explores the
idea of
sharing as a
model to
construct and
disseminate
the knowledge
of literary
heritage with

the people who are represented by and in it. Expert contributors interweave sociological analysis with an appraisal of the transformative impact of technology on literary and cultural production. Does technology restrict, constraining the experience of an oral performance, or does it afford new openings for different aesthetic experiences? Topics

explored include the Mara Cultural Heritage Digital Library, the preservation of Ewe heritage material, new resources for texts in Manding languages, and the possibilities of technauriture. This timely and necessary collection also examines to what extent digital documents can be and have been institutionalised in archives and museums, how digital heritage can remain free

from co-option by hegemonic groups, and the roles that exist for community voices. A valuable contribution to a fast-developing field, this book is required reading for scholars and students in the fields of heritage, anthropology, linguistics, history and the emerging disciplines of multi-media documentation and analysis, as well as those working in the field of literature, folklore, and

African studies. It is also important reading for museum and archive curators. *Ntsikelelo's Dream Catcher* IOS Press
This is an inspirational true story, extolling the power of a dream. The perception of the world with its endless possibilities. Regardless of the circumstances and the challenges, honest living accomplishes the truest most well deserved victory.

Identification of self worth is key to a peaceful approach to life and perseverance and the practise of patience can prove to be very rewarding. Time rewards tons in the presence of the future. Data Analytics in Medicine: Concepts, Methodologies, Tools, and Applications
Ntsikelelo's dream catcher "Many of the goals of South Africa's new democracy depend on the production of professionals

who have not only the knowledge and skills to make our country globally competitive, but also a commitment to working and living here. Despite numerous reforms, the South African health system, ten years into democracy, remains divided: first world private care that ranks with middle income countries internationally at the one end, and at the other extreme, in the rural

public sector in particular, conditions that are superior only to the poorest of African countries. Much work has been done to change medical school curricula in line with the primary health-care focus of government policy, and international trends towards problem-based learning. The student profile in medical schools is now not only more representative of the

demographics of South Africa, but also reveals a significant increase in female students. Whether these students will stay in the country after graduating, and serve where they are needed most, remains to be seen."--

 The abstracts of the XXX International Congress of Psychology (July 2012, Cape Town) are published

as a supplement to Volume 47 of the International Journal of Psychology. The published volume includes the abstracts of the invited addresses, symposia, oral and poster presentations, numbering over 5,000 separate contributions and creating an invaluable overview of the discipline of psychological science around the world today. *Decoloniality, Language and Literacy*

Springer
This volume casts light on mergers and alliances in higher education by examining developments of this type in different countries. It combines the direct experiences of those at the heart of such transformations, university leaders and senior officials responsible for higher education policy, with expert analysts of the systems concerned. Higher education in Europe faces a series of major challenges. The economic crisis has accelerated expectations of an increased role in addressing economic and societal challenges while at the same time putting pressure on available finances. Broader trends such as shifting student demographics and expectations, globalisation and mobility and new ways of working with business have contributed to these increased pressures. In the light of these trends there have been moves, both from national or regional agencies and from individual institutions to respond by combining resources, either through collaborative arrangements or more fundamentally through mergers between two or more universities. After an introductory chapter by the editors which

establishes the context for mergers and alliances, the book falls into two main parts. Part 1 takes a national or regional perspective to give some sense of the historical context, the wider drivers and the importance of these developments in these cases. Included are both systemic accounts (for countries as France, Sweden, Romania, Russia, Wales and England), and specific

cross-cutting initiatives including a major facility at Magurele in Romania and a Spanish programme for promoting international campuses of excellence. Part 2 is built from specific cases of universities, either in mergers or alliances, with examples from different countries (such as France, UK, Romania, Spain, Germany, Denmark, Finland, Switzerland). A concluding chapter by the

editors assesses these experiences and indicates the implications and future needs for understanding in this domain.
