A Dance of Assassins presents the competing histories of how Congolese Chief Lusinga and Belgian Lieutenant Storms engaged in a deadly clash while striving to establish hegemony along the southwestern shores of Lake Tanganyika in the 1880s. While Lusinga participated in the east African slave trade, Storms' secret mandate was to meet Henry Stanley's eastward march and trace "a white line across the Dark Continent" to legitimize King Leopold's audacious claim to the Congo. Confrontation was inevitable, and Lusinga lost his head. His

skull became the subject of a sinister evolutionary treatise, while his ancestral figure is now considered a treasure of the Royal Museum for Central Africa.

Allen F. Roberts reveals the theatricality of early colonial encounter and how it continues to influence Congolese and Belgian understandings of history today.

The book uses anthropological methods and insights to study the practice of anthropology. It calls for a paradigm shift, away from the publication treadmill, toward a more profile-raising paradigm that focuses on addressing a broad array of social concerns in meaningful ways.

In the seventeenth and eighteenth

centuries, French colonists and their Native allies participated in a slave trade that spanned half of North America, carrying thousands of Native Americans into bondage in the Great Lakes, Canada, and the Caribbean. In *Bonds of Alliance*, Brett Rushforth reveals the dynamics of this system from its origins to the end of French colonial rule. Balancing a vast geographic and chronological scope with careful attention to the lives of enslaved individuals, this book gives voice to those who lived through the ordeal of slavery and, along the way, shaped French and Native societies. Rather than telling a simple story of colonial domination and Native victimization, Rushforth argues that Indian slavery in New France emerged at the nexus of two

very different forms of slavery: one indigenous to North America and the other rooted in the Atlantic world. The alliances that bound French and Natives together forced a century-long negotiation over the nature of slavery and its place in early American society. Neither fully Indian nor entirely French, slavery in New France drew upon and transformed indigenous and Atlantic cultures in complex and surprising ways. Based on thousands of French and Algonquian-language manuscripts archived in Canada, France, the United States and the Caribbean, *Bonds of Alliance* bridges the divide between continental and Atlantic approaches to early American history. By discovering unexpected connections between distant peoples and places, Rushforth sheds

new light on a wide range of subjects, including intercultural diplomacy, colonial law, gender and sexuality, and the history of race.

Experts are progressively discovering the crucial role of globally mobile talent in today's competitive business environment and have called the task of

securing and retaining these employees the greatest international human resource challenge to date. While many employees willingly accept international work assignments believing in a positive impact on their careers, high-quality research on global mobility and career success is lacking, leaving thousands of ambitious individuals at risk of making shortsighted career decisions. Providing empirical research in this field to better inform employees, employers, human resource practitioners, fellow researchers and academics lies at the core of this work.

The ideal of "gender equality" seems forever elusive, always tantalizingly over the horizon. Shanshan Du suggests that by shifting our attention away from the various utopian ideals embedded in mainstream feminism, we may be surprised to learn that gender-egalitarian societies do exist. Based on extensive fieldwork, this book explores the Lahu society in Southwest China where practical gender equality has become the byproduct of a potent

ideology of gender unity, vividly expressed by the proverb, "chopsticks only work in pairs."

Thinking Like an Anthropologist: A Practical Introduction to Cultural Anthropology Springer

People living in northern Coclé province, Panama, are proud to be independent. Hereditary leaders make decisions in consensus, a practice understood as continuous from pre-Columbian times. The term cholo, derogatory in some

contexts, is valid here to discuss self-determination. Victoriano Lorenzo led the "War of a Thousand Days" (1901-1903) that is understood in northern Coclé as a fight for indigenous land rights. While state bureaucracies later labeled the region an "area of extreme poverty" and imposed programs seeking to eradicate "poverty," local oral history narratives focus on the interdependence of the natural environment and the human community. The indigenous political structure found liberation power through Catholic theology, and participated in a social movement that stopped a planned expansion of the Panama Canal. This book presents a new understanding of the people and their social structure, informed by extensive archival research

and by oral history interviews the author conducted while living in northern Coclé for approximately four years.

This book explores the diverse ways in which disability activism and advocacy are experienced and practised by people with disabilities and their allies.

Contributors to the book explore the very different strategies and campaigns they have used to have their demands for respect, dignity and rights heard and acted upon by their communities, by national governments and the international community. The book, with its contemporary global focus, makes a significant contribution to the field of disability and social justice studies, particularly at a time of major social, political and cultural upheaval. Global

Perspectives on Disability Activism and Advocacy offers a significant intervention within the field of disability at a time of major social upheaval where actors, advocates and activists are seeking to hold onto existing claims for rights, equality and disability justice.

Because of the increasing breadth and complexity of the field, most texts for introductory-level, general anthropology courses (so-called four-field courses) have tended to become longer and more detailed. In contrast, this concise book, authored by a physical anthropologist, offers a tightly managed amount of detail and a student-friendly narrative approach (explaining its topics through a clear sequence of ideas), while including

all of the traditional topics in anthropology.

In his midtwenties, Dave Asprey was a successful Silicon Valley multimillionaire. He also weighed 300 pounds, despite the fact that he was doing what doctors recommended: eating 1,800 calories a day and working out 90 minutes a day, six times a week. When his excess fat started causing brain fog and food cravings sapped his energy and willpower, Asprey turned to the same hacking techniques that made his fortune to "hack" his own biology, investing more than \$300,000 and 15 years to uncover what was hindering his energy, performance, appearance, and

happiness. From private brain EEG facilities to remote monasteries in Tibet, through radioactive brain scans, blood chemistry work, nervous system testing, and more, he explored traditional and alternative technologies to reach his physical and mental prime. The result? The Bulletproof Diet, an anti-inflammatory program for hunger-free, rapid weight loss and peak performance. The Bulletproof Diet will challenge--and change--the way you think about weight loss and wellness. You will skip breakfast, stop counting calories, eat high levels of healthy saturated fat, work out and sleep less, and add smart supplements. In doing so, you'll gain energy, build lean muscle, and watch the pounds melt off. By ditching traditional "diet" thinking, Asprey went from being

overweight and sick in his twenties to maintaining a 100-pound weight loss, increasing his IQ, and feeling better than ever in his forties. The Bulletproof Diet is your blueprint to a better life.

We live in an increasingly more globalized world, where living and working with people of various cultures is a nearly everyday occurrence. These interactions, combined with ever-growing opportunities for students to explore and study in foreign settings, make it important to master effective ways to engage and learn from these

experiences. Intercultural Communication will engage readers interested in developing intercultural competence with an eye towards fostering diverse and vibrant communities that coexist peacefully. The authors begin by defining competent communication and describing how it contributes to peaceful communities before considering how cultural differences relate to the effects of cultural frames, emotions, and nonverbal and verbal communication. The second half of the book surveys how culture influences friendships, families, classrooms, workplaces, the media, and our visits to cultures different from our own. Recognizing the effects of these influences allows readers to take advantage of opportunities and

overcome obstacles to more fully immerse themselves in a different way of life. Each chapter offers various boxed inserts with important and entertaining insights to supplement topics and provide opportunities for discussion. Encyclopedia of Human Services and Diversity Edicions Universitat Barcelona Encyclopedia of Human Services and Diversity is the first encyclopedia to reflect the changes in the mission of human services professionals as they face today's increasingly diverse service population. Diversity encompasses a broad range of human differences, including differences in ability and disability, age, education level, ethnicity, gender, geographic origin, religion, sexual orientation, socioeconomic class, and values. Understanding the needs

and problems of Asian Americans, Hispanic Americans, the deaf, the blind, the LGBT community, and many other groups demands an up-to-date and cutting-edge reference. This three-volume encyclopedia provides human services students, professors, librarians, and practitioners the reference information they need to meet the needs of an increasingly diverse population. Features: 600 signed entries are organized A-to-Z across three volumes. Entries, authored by key figures in the field, conclude with cross references and further readings. A Reader's Guide groups related articles within broad, thematic areas, such as aging, community mental health, family and child services, substance abuse, etc. A detailed index, the Reader's Guide, and

cross references combine for search-and-browse in the electronic version. A helpful Resource Guide guides students to classic books, journals, and web sites, and a glossary assists them with the terminology of the field. Available in both print and electronic formats, Encyclopedia of Human Services and Diversity is an ideal reference for students, practitioners, faculty and librarians.
