This textbook offers a comprehensive review of tractor design fundamentals.

Discussing more than hundred problems and including about six hundred international references, it offers a unique resource to advanced undergraduate and graduate students, researchers and also practical engineers, managers, test engineers, consultants and even old-timer fans. Tractors are the most important pieces of agricultural mechanization, hence a key factor of feeding the world. In order to address the educational needs of both less and more developed countries,

the author included fundamentals of simple but proved designs for tractors with moderate technical levels, along with extensive information concerning modern, premium tractors. The broad technical content has been structured according to five technology levels, addressing all components. Relevant ISO standards are considered in all chapters. The book covers historical highlights, tractor project management (including cost management), traction mechanics, tires (including inflation control), belt ground drives, and ride dynamics. Further topics are: chassis design, diesel engines (with emission limits and installation

instructions), all important types of transmissions, topics in machine element design, and human factors (health, safety, comfort). Moreover, the content covers tractor-implement management systems, in particular ISOBUS automation and hydraulic systems. Cumulative damage fundamentals and tractor load spectra are described and implemented for dimensioning and design verification. Fundamentals of energy efficiency are discussed for single tractor components and solutions to reduce the tractor CO₂ footprint are suggested.

It is a wet day in Dorset, and walking to a luncheon party is Sir Edward Feathers QC, followed by two elderly friends: his scruffy neighbour and sparring partner, Veneering, and Fiscal-Smith, the meanest lawyer ever to make a fortune at the Bar. Fans of Jane Gardam's bestselling novel, OLD FILTH, will be delighted to encounter Filth, now almost ninety, making his immaculate way to Privilege Hill, named perhaps for the Prive-Lieges who arrived with the Normans, but more probably for the village privies. Ranging

from a Victorian mansion converted into a home for unmarried mothers to a wartime hospital in the middle of the Blitz, from ghost stories to brilliant observations of love and loneliness in their various manifestations - including, in 'Pangbourne', a woman who falls in love with a gorilla - to reflections on the haphazard nature of intellect and memories in 'The Last Reunion', the stories in this collection mix Jane Gardam's trademark sardonic wit with a delicate tenderness and a touch of the surreal.

Fidel Castro is one of the most interesting and controversial personalities of our time - he has become a myth and an icon. He

was the first Cuban Caudillo – the man who freed his country from dependence on the USA and who lead his people to rediscover their national identity and pride. Castro has outlived generations of American presidents and Soviet leaders. He has survived countless assassination attempts by the CIA, the Mafia, and Cubans living in exile. He has become one of the greatest politicians of the 20th Century. His biography, and the history of his country exemplify the tensions between East and West, North and South, rich and poor. As Castro's life draws to a close, the question as to what will become of Cuba is more important that ever. Will Castro open Cuba to economic reform and democratization,

or stick to his old slogan socialism or death? In this remarkable, up-to-date reconstruction of Castro's life, Volker Skierka addresses these questions and provides an account of the economic, social, and political history of Cuba since Castro's childhood. He draws on a number of little-known sources, including material from the East German communist archives on Cuba, which were until recently inaccessible. This is an exciting, painstakingly researched, and authoritative account of the life of one of the most extraordinary political figures of our time.

In 1998, Sarbjit Athwal was called by her husband to attend a

family meeting. It looked like just another family gathering. An attractive house in west London, a large dining room, two brothers, their mother, one wife. But the subject they were discussing was anything but ordinary.

At the head of the group sat the elderly mother. She stared proudly around, smiling at her children, then raised her hand for silence. 'It's decided then,' the old lady announced. 'We have to get rid of her.' 'Her' was Surjit Athwal, Sarbjit's sister-in-law. Within three weeks of that meeting, Surjit was dead: lured from London to India, drugged, strangled, and her body dumped in the Ravi River, never to be seen again. After the killing, risking her

own life, Sarbjit fought secretly for justice for nine long, scared years. Eventually, with immense bravery, she became the first person within a murderer's family ever to go into open court in an honour killing trial as the Prosecution's key witness, and the first to waive her anonymity in such a trial. As a result of her testimony, the trial led to the first successful prosecution of an honour killing without the body ever being found. But her story doesn't end there. Since the trial, her life has been threatened; her own husband arrested after an allegation of intimidation. *Shamed* is a story of fear and of horror - but also of immense courage, and a woman who risked

everything to see that justice was done.

Max Stirner was one of the most important and seminal thinkers of the mid-nineteenth century. He exposed the religiosity behind secular humanism and rationalism, and the domination of the individual behind liberal modes of politics. This edited collection explores Stirner's radical and contemporary importance as a political theorist.

This volume covers not only the wartime story of the German Navy, but also shows how it stealthily built up in the 20s and 30s, in defiance of the treaty

of Versailles. The famous pocket battleships are examined, as well as U-boats, minesweepers and one-man torpedoes.

By the end of the twentieth century there were some half-million tractors on British farms - more machines than people to drive them. Brian Bell's encyclopaedic book traces the

evolution of the farm tractor from the days of starting handle and pan seat to current 4-wheel drive machines with air-conditioned cabs and computer management systems. He deals in particular with developments of the classic period from the 1950s to the 1990s. The book is arranged alphabetically by manufacturer from Allis-Chalmers to Zetor, one hundred marques in total. These are all machines to be found on British farms irrespective of their country of manufacture. Brian runs concisely through the histories of the companies and their major models, illustrated with a wealth of photographs and extracts from sales literature. He adds some special features

on items such as hydraulic systems and cold-starting aids. He includes a glossary and full index. This book replaces the author's earlier, successful, *Fifty Years of Farm Tractors*. Many of the photographs are new and the text has been brought up to date to include developments of the early twenty-first century.

Nietzsche's love affair with the theater was

among the most

profound and

prolonged intellectual

engagements of his

life, but his

transformational role in

the history of the

modern stage has yet

to be explored. In this

pathbreaking account,

David Kornhaber

vividly shows how

Nietzsche reimagined

the theatrical event as

a site of philosophical

invention that is at

once ancestor,

antagonist, and

handmaiden to the

discipline of philosophy

itself. August

Strindberg, George

Bernard Shaw, and

Eugene O'Neill—

seminal figures in the

modern drama's

evolution and avowed

Nietzscheans all—came away from their encounters with Nietzsche's writings with an impassioned belief in the philosophical potential of the live theatrical event, coupled with a reestimation of the dramatist's power to shape that event in collaboration with the actor. In these playwrights' reactions to and adaptations of Nietzsche's radical rethinking of the stage lay the beginnings of a new direction in modern theater and dramatic literature.

1 Esdras is an alternative version of the book of Ezra-Nehemiah in the Septuagint. Most Eastern Orthodox churches accord the

book canonical status. This is the first commentary on 1 Esdras based on the critical text of the Göttingen Septuagint edition. It understands 1 Esdras not simply as a fragment of the Chronistic history or as merely a compilation, but rather as a coherent narrative. Its interpretation as a literary work and the reconstruction of its composition take into account both the historical backgrounds of the narrative setting of the Persian period and the historical location of the composition in the Hasmonaean period. 1 Esdras is currently enjoying a period of renewed attention in scholarship. Its relationship to Ezra-Nehemiah is seen as a prime example of

literary-historical
developments in Israel.
